

The Liège ORBi model: Mandatory policy without rights retention but linked to assessment processes

Bernard Rentier
Rector

(with Paul Thirion
Head Librarian)

ULg, Liège, Belgium

Enabling Open Scholarship

Open Access: Repositories

Université
de Liège

- Institutional repositories
- Must be interoperable
- Participate in a worldwide network and contribute to a global data base of all research in OA
- Must be searchable
- Are currently 1,568 but few are “full text”
→ incomplete

Enabling Open Scholarship

Open Access: Repositories

- Mandate
- Enforcement
- Quality & Services
- Incentives & Sanctions

Why a mandate?

Université
de Liège

- An institutional repository makes sense only if exhaustive
- An institutional repository fills up only with a mandate (90% vs 8%)
- Straight obligation is not part of the University mores
- Many obligations do exist.
 - All that is needed is add this one but make sure it is understood, to stimulate a positive spirit
- A mandate can be firm but soft

ORBi and Open Access News
All news

Être plus cité grâce aux répertoires institutionnels et au libre accès!
28/10/2011
D'après de nombreuses études référencées sur le très exhaustif [Open Citation Project](#), le libre accès mène à un accroissement significatif du nombre de citations des références (de 2,5 à 5 fois plus que pour un article papier).
[More info](#)

Your publications more accessible, a more rapid visibility
27/10/2011
Immediate and barrier free access to the latest research results is essential. Today over **20% of the whole of the worldwide academic and scientific literature** is already available on Open Access: 8.5% through journals which are on open access and 11.9% via institutional repositories ([Björk](#), 2010). Figures which are constantly rising !
[More info](#)

Liberate your publications completely legally
26/10/2011
More and more publishing are adopting a **policy which favours Open Access**, and are authorising the depositing of publications on open access on an institutional repository such as ORBi, at the minimum the final author version accepted for publication (*author postprint*).
[More info...](#)

ORBi (Open Repository and Bibliography)

In may 2007, the ULg's Administrative Board (joined in June 2007 by the [FUSAGx](#)) decided to create an institutional repository and defined a strong institutional self-archiving policy to increase the visibility, accessibility and impact of the University's publications ([Board's decision](#)).

This decision led to the official launch, in November 2008, of the ORBi platform including both the Academic Bibliography and the Institutional Repository of the Wallonia-Europe University Academy.

Why a mandate?

Université
de Liège

- The Mandate « à la liégeoise »: a stick
 - ⊙ ORBi generates automatically a report that can be downloaded directly by academic authorities
 - ⊙ ORBi generates automatically a report that is the only official document for evaluations at ULg
 - promotions
 - grant proposals
 - etc.
 - ⊙ The ORBi website is accessible to all, it can be sorted, among other criteria, by author's names
 - ⊙ The ULg institutional phonebook is linked directly to ORBi

Enabling Open Scholarship

Why a mandate?

Université
de Liège

- The Mandate « à la liégeoise »: a carrot
 - ORBi publishes permanent statistics of consultation
 - ORBi publishes a « hit parade » of most consulted authors, most downloaded articles, etc.
 - ORBi has direct links to any citation of the articles
 - The report generated automatically by ORBi is nicely and logically presented, according to the traditional values of the major research sectors. It can be used as a publication list for CVs and can be printed in an updated version, at any time

Enabling Open Scholarship

Why a mandate?

Université
de Liège

🌐 The Mandate « à la liégeoise »: positive facts

- 🕒 ORBi increases considerably the readership of an article

*Number of
consultations
per month:
on average
1,500 after
1 year*

Enabling Open Scholarship

Why a mandate?

Université
de Liège

The Mandate « à la liégeoise »: positive facts

- Being in ORBi increases considerably the readership of an article
- Being in ORBi increases the citations of an article

Enabling Open Scholarship

Why a mandate?

Université
de Liège

The Mandate « à la liégeoise »: positive facts

- ⦿ Being in ORBi increases considerably the readership of an article
- ⦿ Being in ORBi increases the citations of an article
- ⦿ Being in ORBi provides a second life to older articles

As long as the repository contains full text references and is searchable by engines

Enabling Open Scholarship

ORBi's Gamble...

Université
de Liège

Won, over our wildest dreams !

Nature of the publications

Enabling Open Scholarship

Numbers

68,000 references

- ⊙ On average: 63 references added each day (75 the 1st year)
 - On May 25, 2010: 700 references added on a single day !
 - Still far from the 10/day expected on cruise speed after the rush...
- ⊙ 5,382 ULg authors have entered their own references in ORBi

According to ROAR (<http://roar.eprints.org>), out of 1,568 IRs,

- ⊙ 27th worldwide for the total number of references
- ⊙ Number 15 for « high activity level » (number of days in the last year with over 100 deposits/day) (Number 1 until last year)
- ⊙ Number 1 for « medium activity level » (number of days in the last year with 10-99 deposits/day)

Enabling Open Scholarship

Open or Restricted Access ?

Université
de Liège

Of these 68,000

- 41,000 are Full Text (60.12% of all deposits)
- 20,594 are in OA

Full Text in ORBi

Enabling Open Scholarship

Open Access vs Restricted Access

Success: because of the mandate? Not just that!

Université
de Liège

Many more references introduced than expected

- ⊙ 36.8% references older than required (2002)
- ⊙ «Scientific Publications» in the broad sense
 - « Traditional » Publications : 81.5%
 - But also unpublished communications, reports, teaching material, lectures, etc... : 18.5%

Much more Full Text than expected

- ⊙ 38.9% articles older than 2002 are Full Text!
- ⊙ 41.1% publications « non-articles » are Full Text!

Enabling Open Scholarship

Success: other explanations?

Université
de Liège

🌐 ORBi corresponds to a need for the Institution but also for the researchers

- 🕒 Multiple winners

- 🕒 But need to convince (takes too much time, hence the mandate!)

🌐 ORBi puts the researcher to the center of the game

- 🕒 Nobody does it better

- 🕒 Several authors, one entry

Enabling Open Scholarship

Success: other explanations?

Not just another tool for librarians

- ⦿ User-oriented and user-friendly
- ⦿ « Light » workload : 10 min/reference
- ⦿ Focused on what makes sense for authors
- ⦿ Variable according to disciplines
- ⦿ Technically up to date
 - Automatic helper tools: dynamic scrolling lists
 - Contextual help
 - Possibility to import (PubMed, WOS, SAO/NASA, EndNote X, BibTeX ...)

Enabling Open Scholarship

Success: other explanations?

Université
de Liège

Increased visibility

- ⦿ Big Open Access harvesting tools (OAIster, Driver, Scientific Commons, Base, ...)
- ⦿ Google Scholar
- ⦿ SciVerse (Elsevier)
- ⦿ Broad scope search engines (Google, ...)

Enabling Open Scholarship

Success: other explanations?

Added value Service

⦿ Legal assistance

- Detailed legal Guide
- Automatic links to Sherpa/ROMEO (publishers' policies)
- Legal toolbox (models of letters to publishers and of legal texts or modifications to keep or recover diffusion rights, ...)

⦿ Active hotline

- Any question? An accurate answer within 24 h (including during the weekend)

Enabling Open Scholarship

Success: other explanations?

Added value Service

- ⊙ Permanent and simple filing
- ⊙ Visualisation & downloads
 - Only by humans (exclusion 20,000 spiders,...)
 - Distinguishing « at ULg » & « outside ULg »
 - Per reference, author, month, country. Globally, top 20 ...
- ⊙ Impact Factor (current + the year of publication), IF5, Eigen Factor, article Influence
- ⊙ Citations (Weekly): Google Scholar, WOS
- ⊙ h-Index

Enabling Open Scholarship

Success: other explanations?

Added value Service

⦿ Automatic generation of Reports

- Multiple use (CV, applications, web link,...)
- Multiple formats (PDF, HTML, DOC, XML...)
- Disciplinary presentation templates designed with representatives of academic sectors
- Personalisation
 - Different bibliographic formats (APA, Chicago,...)
 - Other additions (optional): bibliometrics, abstracts, peer review assessment,...

⦿ Widget : Dynamic integration in Web pages

Enabling Open Scholarship

Success: other explanations?

Awareness

- ⦿ Direct link with the University Phone Book
- ⦿ ORBi sends around 12,000 e-mails per month to co-authors (agreement, signatures,...)
- ⦿ Emulation

A researcher's goal when writing a publication: being read

Université
de Liège

- ORBi items are visible on Google search engines within one hour
- Usage statistics : strong increase
 - Over 1,340,000 visualisations
 - Over 531,000 downloads (currently: 1,100/day)
 - Belgium : 29,7%
 - France : 16,6 %

Enabling Open Scholarship

The ORBi advantage

Increase in readership

⦿ Average number of downloads for references 2008-2010:

- 15.4 times more for papers in OA than in restricted access (RA)
- 26.7 times more if downloads inside ULg are removed

(as of March 2011, twice more than in 2010!)

Enabling Open Scholarship

The ORBi advantage

Université
de Liège

Enabling Open Scholarship

ORBi: a complete success?

Université
de Liège

Still too many filing errors

- ⦿ Typos, mistakes in titles, misspellings, etc.
- ⦿ Some fraud (in the order of authors)
- ⦿ Some false full texts

Enabling Open Scholarship

ORBi: a model?

- Other Belgian universities
- University of Luxembourg
- University of Lorraine (Metz-Nancy)
- Czech Academy of Sciences
