EXECUTIVE COMMITTEE

CHAIRMAN

Prof. Dr. Ir. Jacqueline LECOMTE-BECKERS
University of Liege – Belgium

LOCAL ORGANIZING COMMITTEE

Prof. Dr. Ir. Jacqueline LECOMTE-BECKERS
University of Liege – Belgium

Prof. Dr. Yasuhiro MATSUBARA
Kurume National College of Technology - Japan
Chairman, Board of Trustees, Fukuoka Jo Gakuen - Japan

Prof. Fabienne DELAUNOIS
University of Mons – Belgium

Ir. Jérome Tchoufang TCHUINDJANG
University of Liege – Belgium

Mr. Mario SINNAEVE
Marichal Ketin – Belgium

Ir. Jean-Pierre BREYER
JPB Consulting/Marichal Ketin - Belgium

INTERNATIONAL ADVISORY ORGANIZING COMMITTEE

Prof. Dr. Yasuhiro MATSUBARA
Kurume National College of Technology - Japan
Chairman, Board of Trustees, Fukuoka Jo Gakuen - Japan

Dr. Mario BOCCALINI, Jr.
IPT – Brazil

Prof. Dr. Yung-Ning PAN
Taiwan National University - Taiwan

MSc Tommy NYLÉN
Eisenwerk Sulzau Werfen - Austria

Prof. Dr. Sudsakorn INTHIDECH
Mahasarakham University - Thailand

Prof. Dr. Amilton SINATORA
Sao Paulo University – Brazil

Dr. Omer DOGAN
National Research Center - USA

Prof. Massimo PELLIZZARI
University of Trento – Italy

Prof. Dr. Kaoru YAMAMOTO
Kurume National College of Technology - Japan

Prof. Dr. Takateru UMEDA
Chulalongkorn University – Thailand

Prof. Dr. Setuo ASO
Akita University – Japan

Dr. Mitsuo HASHIMOTO
Fujico Co. - Japan

Mr. Xuegang ZHU
Sinosteel Xingtai Machinery & Roll Co., Ltd. - China

CONFERENCE SECRETARY

Mrs. Rosine PIRSON & Ir. Jérome Tchoufang TCHUINDJANG
University of Liege – Belgium
FOREWARD

The « Abrasion » Conferences offer an almost unique opportunity to gather every three years people working in the field of abrasion resistant high chromium irons to be used in rolling and pulverizing mills. The well addresses topic and the small, but very active research community are the key factors for the success of this event. The University of Liege receives the organization by inheritance form Fukuoka (Japan 2002), São Paulo (Brazil 2005) and Trento (Italy 2008). It represents a very tough challenge for the local organizing committee, but the enthusiasm to host in Liege academic staff and people from the industry coming from all around the world was too big to renounce to this opportunity.

The number of contributions for this fourth edition confirms that the idea of professor Matsubara to promote the meeting between University and Industry was really responding to the expectations of both these subjects. Scientists and technicians of 12 countries will attend the conference: Austria, Belgium, Brazil, France, Germany, Italy, Japan, Spain, Sweden, Taiwan, Thailand and Turkey. Twenty high quality contributions dealing with solidification, heat treatments, microstructural properties, oxidation and wear resistances will be presented.

I believe that the present proceedings will contribute to the extension of knowledge in the area of science, research, development and application in Abrasion Wear Resistant Alloyed Cast Irons for Rolling and Pulverizing Mills. Proceedings are also available in a CD Rom version.

A special thanks to all people contributing to the organization of the ABRASION 2011, to the nearby industries Åkers, Arcelor, ESW, GP, Magotteaux, MK, and to the CRM Group for offering the opportunity of the technical visit to the Research plant in Liege.

The Conference Chairman,

Prof. Dr. Ir. Jacqueline LECOMTE-BECKERS
Table of Contents

HSS rolls: from research investigations to the mill (K01) .......................................................... 01
Massimo PELLIZZARI and Alberto TREMEA

Transformation characteristics of the hardfacing deposits by hard particles core sheathed electrode (T04) ................................................................. 21
Setsuo ASO, Hiroyuki IBE, Nobuo KONISHI, Suken HOU, Ken-ichi OHGUCHI and Yoshinari KOMATSU

Behavior of Hardness and Retained Austenite during Subcritical Heat Treatment of High Chromium Cast Irons with Molybdenum (T07) ........................................ 33
Sudsakorn INTHIDECH, Prasonek SIRIHAJORUSCHEI and Yasuhiro MATSUBARA

Wear Resistance Characteristics of High-Cr White Cast Irons of Various Alloying Compositions (T02) ................................................................. 45
Yung-Ning PAN, Sheng-Hau WANG, Kaoru YAMAOTO, Nobuya SASAGURI and Yasuhiro MATSUBARA

Influence of High Temperature Heat Treatment on in situ Transformation of Mo-rich Eutectic Carbides in HSS and Semi-HSS Grades (T16) ........................................... 61
Jéréme Tchoufang TCHINDJANG, Mario SINNAEVE, and Jacqueline LECOMTE-BECKERS

Influence of Cobalt Content on Heat Treatment Behavior and Abrasive Wear Characteristics of Multi-Component White Cast Iron (T05) ........................................ 77
Nobuya SASAGURI, Yuyo YOKOMIZO, Kaoru YAMAMOTO and Yasuhiro MATSUBARA

Tribology, a loss lesset for the Choice of wear-resistant Roll Materials (K03) ......................................... 89
Adrien MAGNEE and Jean-Claude HERMAN

Development of New Type Indefinite Chilled Double Poured Cast Iron (ICDP) Work Roll with Higher Wear Resistance (T10) .................................................... 91
Hajime MORIKAWA and Yutaka TSUJIMOTO

Erosion characteristics of high chromium cast iron at high temperature of 1173K (T12) ............. 101
Kazumichi SHIMIZU, Xinba YAER, Hiroya HARU and Masahito TANAKA

Effects of Ti, V and Nb carbide on the properties of ICDP cast iron finishing rolls (T17) ............. 111
Fabienne DELAUNOIS, Mario SINNAEVE and Véronique VITRY
Overview: High speed steels for hot rolling mill rolls (K02) ................................. 123
Mario BOCCELLINI Jr.

Abrasive Wear Resistance of Hypoeutectic 16 wt% and 26 wt% Cr Cast Irons with Molybdenum (T06) ................................................................. 143
Attaast CHOOPRAJONG, Sudsakorn INTHIDECH, Prasoonk Sricharoenchai, Kooru YAMAMOTO, Nobuya SASAGURI and Yasuhiro MATSUBARA

Work Roll Surface Degradation in Hot Rolling: on site and laboratory evaluation methods (T18) ................................................................. 157
S. FLAMENT, G. WALMAG, J. MALBRANCKE, G. MOREAS and Mario SINNAEVE

New wear resistant cast alloys for use at elevated temperatures (T01) ................................. 171
Gerhard GEVELMANN and Werner THEISEN

Effects of Alloying Element on Compressive and Wear Properties of Multi-component White Cast irons for Steel Rolling Mill Rolls (T11) ................................. 183
Mitsuo HASHIMOTO

Damage Mechanisms of HSM Work Roll Grades for Roughing Stands - Tribological Approach (T15) ................................................................. 193
Catherine VERGNE, O. JOOS, Claude GASPARD, Jose TINOCO, Mohammed MOUJIB, Christine BOHER, and Farhad REZAI-ARIA

Influence of Alloying Elements on High Temperature Hardness of M2C3 Carbide in High Chromium White Iron (T08) ................................................................. 201
Kooru YAMAMOTO, Nobuya SASAGURI and Yasuhiro MATSUBARA

Indefinite Chill Roll Material – History and Development (T19) ................................. 211
Tommy NYLEN

Microstructure Characterization Trial of High Vanadium Castings for Crushing Machine Parts of Rice Husk (T09) ................................................................. 223
Takateru UMEDA and Hirunlabh CHATCHAI

Effect of erodent properties on erosive wear behaviour of high chromium cast irons (T14) ................................. 229
Kenta KISUMOTO, Kazumichi SHIMIZU, Xinba YAER, Hiroya HARA and Masahito TANAKA

Table of Index and Keywords ................................................................. 235
