

Acknowledgements

We would like to heartily thank our sponsors:

- Université de Liège
- Fonds National de la Recherche Scientifique
- Fédération Wallonie-Bruxelles
- CSL – Centre Spatial de Liège
- AMOS – Advanced Mechanical and Optical Systems

Most of the research presented here by scientists from the University of Liège has been performed thanks to a Prodex contract “CoRoT-Exploitation of the data”.

Our special thanks to Gilles Fontaine, who immediately accepted our invitation to join the LIAC on Board and become the president of this colloquium. We are also grateful to all the invited speakers who gave splendid talks, to all the participants who presented talks or posters or simply animated the discussions and to all the session chairs. With their expertise and enthusiasm, all these people contributed to the success of the meeting. A heartfelt thank to Virginie Chantry for her never-ending smiling help!
