Conference Outline and Early Call for Papers

2012年10月25-26日

The Conference:

We welcome you to the Ninth International Guanghua Nursing Conference, and the first to be held outside China. The conference has been designed to maximise shared learning of nursing's contribution to health delivery, education and international collaboration. It provides a unique opportunity for international and national agencies, health policy and workforce analysts, regulators, universities, academics, academic and professional nurses and health professionals to contribute to analyses of nursing across continents. The conference will be of particular interest to Chinese, UK and European universities that have an interest in participating in the ambitious Guanghua Nurse Fund scheme to enhance nursing standards in China through engaging with European universities, a scheme which is a legacy of a Prime Minister's Initiative project funded by the British Council.
