(based on joint research with  
S. Rosmorduc, CNAM – France)

## Towards a typology of hieroglyphic sign functions

Categorization and fluidity in the description of  
semiotic systems

## Outline of the talk

- **Historical approach:  
The functions of hieroglyphic signs**
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - The dual view (Sethe, Gardiner, etc.)
  - A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)
  - Schenkel's square of hieroglyphic functions (and Kammerzell's revision)
  - Morenz' tree of hieroglyphic functions
- **Towards a new taxonomy**
  - Combining the syntagmatic and paradigmatic dimensions
  - Definition of the categories and prototypical examples
- **Categorization and fluidity**
  - Pictograms in action
  - Logograms other semograms
  - Phonograms and radicograms

# The functions of hieroglyphic signs

## Ancient authors

- Titus Flavius Clemens, a.k.a. Clement of Alexandria (150-215 AD)
  - Book V of his *Stromata* (lit. patchwork), 4,20-21
    - Three ‘writing systems’
    - Αὐτίκα οἱ παρ’ Αἰγυπτίοις παιδευόμενοι πρῶτον μὲν πάντων τὴν Αἰγυπτίων γραμμάτων μέθοδον ἐκμανθάνουσι, τὴν ἐπιστολογραφικὴν καλουμένην, δευτέραν δὲ τὴν ἱερατικὴν, ἣ χρῶνται οἱ ἱερογραμματεῖς ὑστάτην δὲ καὶ τελευταίαν τὴν ἱερογλυφικὴν
    - « The ones among the Egyptians who are educated first and foremost learn the writing system which is called *epistolographic*, in a second step the *hieratic*, which the hierogrammats use, finally and as the last one, the *hieroglyphic*...

# The functions of hieroglyphic signs

## Ancient authors

- Titus Flavius Clemens, a.k.a. Clement of Alexandria (150-215 AD)
  - Book V of his *Stromata* (lit. patchwork), 4,20-21
    - Three ‘writing systems’
    - ὑστάτην δὲ καὶ τελευταίαν τὴν ἱερογλυφικὴν... ἧς ἡ μὲν ἐστὶ διὰ τῶν πρώτων στοιχείων κυριολογικὴ, ἡ δὲ συμβολικὴ
    - “finally and as the last one, the *hieroglyphic*... which, on the one hand, expresses things properly with the primary letters, and on the other hand uses symbols”

# The functions of hieroglyphic signs

## Ancient authors

- Titus Flavius Clemens, a.k.a. Clement of Alexandria (150-215 AD)
  - Book V of his *Stromata* (lit. patchwork), 4,20-21
    - Three 'writing systems'
    - Two types of hieroglyphic signs
      - Primary letters (⇒ consonants)
      - Symbols
        - Express things properly through imitation
        - Are like metaphors (ὡσπερ τροπικῶς γράφεται)
        - Are actual allegories, using enigmas (ἀλληγορεῖται κατὰ τινὰς αἰνιγμούς)

*Interpretatio graecae*  
(figurative interpretation)

## Outline of the talk

- Historical approach:  
The functions of hieroglyphic signs
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - **The evolution of Champollion's description**

# The functions of hieroglyphic signs

Champollion (1790-1832)

■ 1822

LETTRE  
A M. DACIER,  
SECRÉTAIRE PERPÉTUEL DE L'ACADÉMIE ROYALE  
DES INSCRIPTIONS ET BELLES-LETTRES,  
RELATIVE A L'ALPHABET  
DES HIEROGLYPHES PHONÉTIQUES  
EMPLOYÉS PAR LES ÉGYPTIENS POUR INSCRIRE SUR LEURS MONUMENTS  
LES TITRES, LES NOMS ET LES SURNOMS DES SOUVERAINS GRECS ET  
ROMAINS;  
PAR M. CHAMPOLLION LE JEUNE.

A PARIS,  
CHEZ FIRMIN DIDOT PÈRE ET FILS,  
LIBRAIRES, RUE JACOB, N° 24.

M. DCCC. XXII.

8° 41549 (1)

# The functions of hieroglyphic signs

Champollion (1790-1832)

■ *Lettre à M. Dacier* (1822, p. 3)

de l'Égypte: car il s'agit de la série des *hiéroglyphes* qui, **faisant exception** à la nature générale des signes de cette écriture, étaient **doués de la faculté d'exprimer les sons** des mots, et ont servi à inscrire sur les monuments publics de l'Égypte, les *titres*, les *noms* et les *surnoms des souverains grecs ou romains* qui la gouvernèrent successivement. Bien des certitudes pour l'histoire de cette contrée

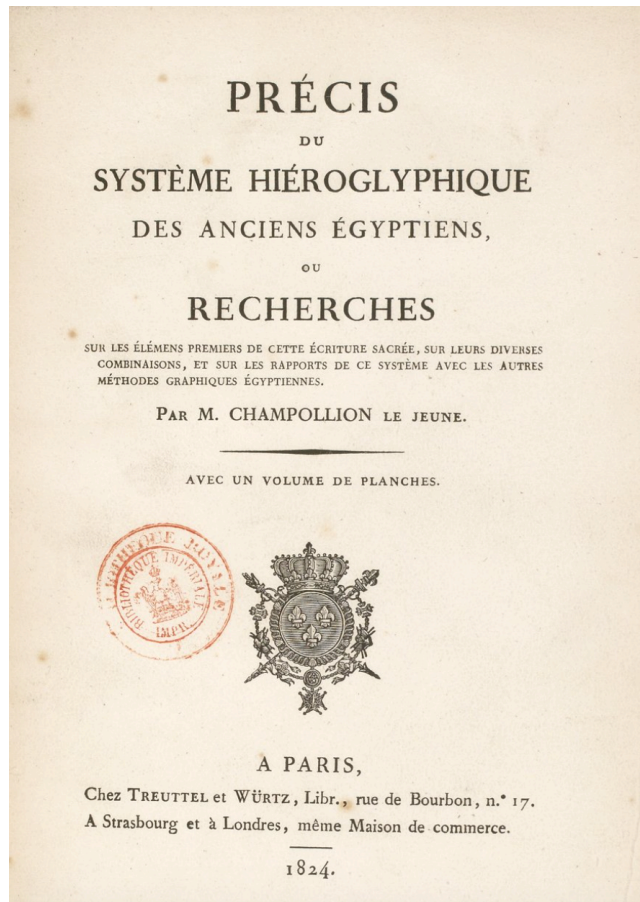

# The functions of hieroglyphic signs

Champollion (1790-1832)

■ *Lettre à M. Dacier* (1822, p. 3)

■ 1824

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Lettre à M. Dacier* (1822, p. 3)
- *Précis du système hiéroglyphique* (1824, p. xiv)

Il était naturel d'adopter, pour la *transcription des mots et des formules hiéroglyphiques*, l'alphabet *copte*, c'est-à-dire l'alphabet que les Égyptiens devenus chrétiens empruntèrent aux Grecs en abandonnant pour toujours leurs anciennes écritures nationales, puisque c'est avec ce même alphabet que sont écrits les livres qui nous ont transmis la langue égyptienne elle-même dans presque toute son intégrité. Il faut observer seulement que les mots coptes qui, dans une transcription quelconque, *sont placés entre deux parenthèses*, n'expriment que le *mot égyptien* correspondant à un signe ou groupe hiéroglyphique; lequel étant *idéographique* et non *phonétique*, ne rendait point de son.

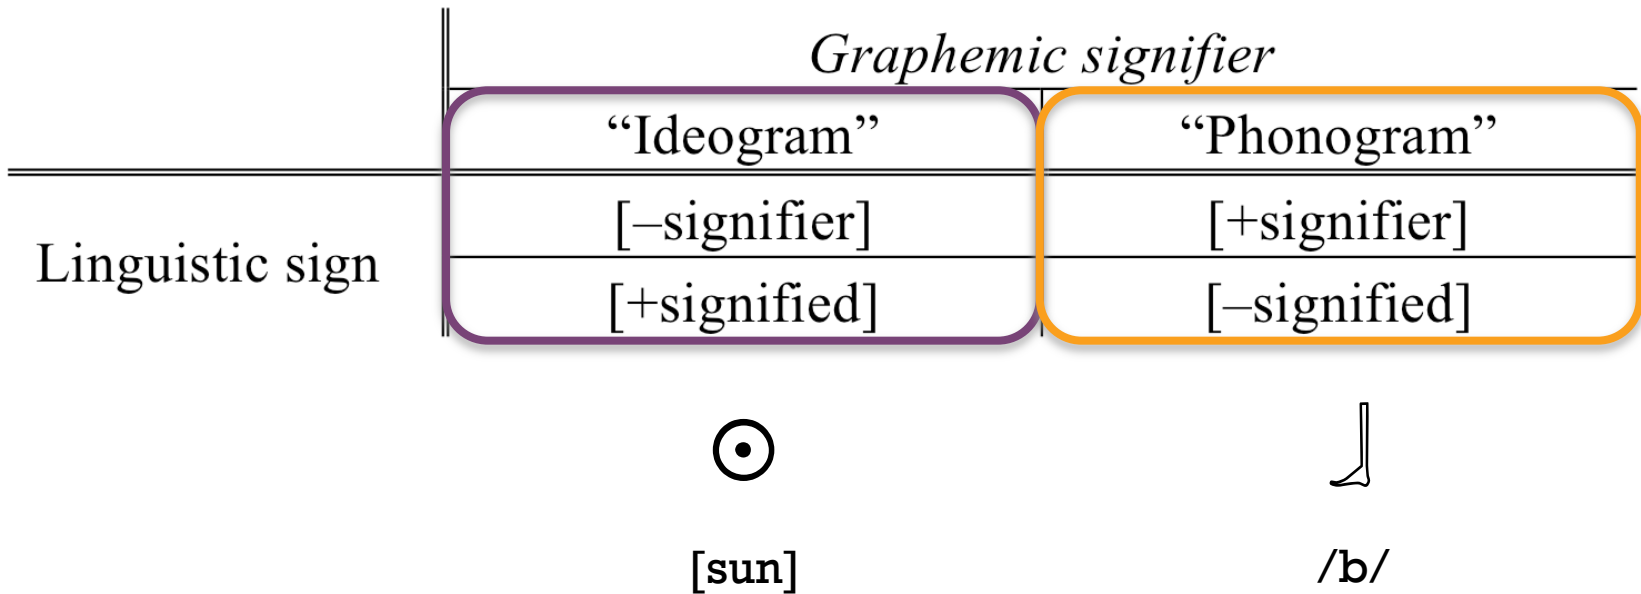

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Lettre à M. Dacier* (1822, p. 3)
- *Précis du système hiéroglyphique* (1824, p. xiv)
  - Two main classes

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Lettre à M. Dacier* (1822, p. 3)
- *Précis du système hiéroglyphique* (1824, p. 313-314)
  - Two main classes
  - Two subclasses of ideograms (cf. Clement of Alexandria), based on the relation perceived between the graphemic signifier and the linguistic signified

mais les uns, les caractères figuratifs, exprimaient directement les objets mêmes dont ils retraçaient l'image; les autres, les caractères tropiques ou symboliques, exprimaient indirectement des idées avec lesquelles l'objet qu'ils imitaient dans leur forme n'avait que des rapports fort éloignés; et les caractères phonétiques n'exprimaient ni directement ni indirectement des idées, mais seulement des voix et des articulations simples.

# The functions of hieroglyphic signs

Champollion (1790-1832)

		<i>Graphemic signifier</i>	
		“Ideogram”	“Phonogram”
<i>Linguistic sign</i>		[-signifier]	[+signifier]
		[+signified]	[-signified]
		Direct Relation “figurative” <sup>6</sup>	Indirect Relation “symbolic” <sup>7</sup>

- Proper
- Abbreviated
- Conventional

■ Metaphor

■ Enigma

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Lettre à M. Dacier* (1822, p. 3)
- *Précis du système hiéroglyphique* (1824, p. 313-314)
  - To sum up, the function of any hieroglyphic sign is defined according to
    - The element of the linguistic sign it refers to
      - Signified (meaning/content, “first articulation unit”) ⇒ Ideogram
      - Signifier (sound, “second articulation unit”) ⇒ Phonogram
    - Its relationships with the linguistic signified
      - Direct ⇒ Figurative
      - Indirect ⇒ Symbolic

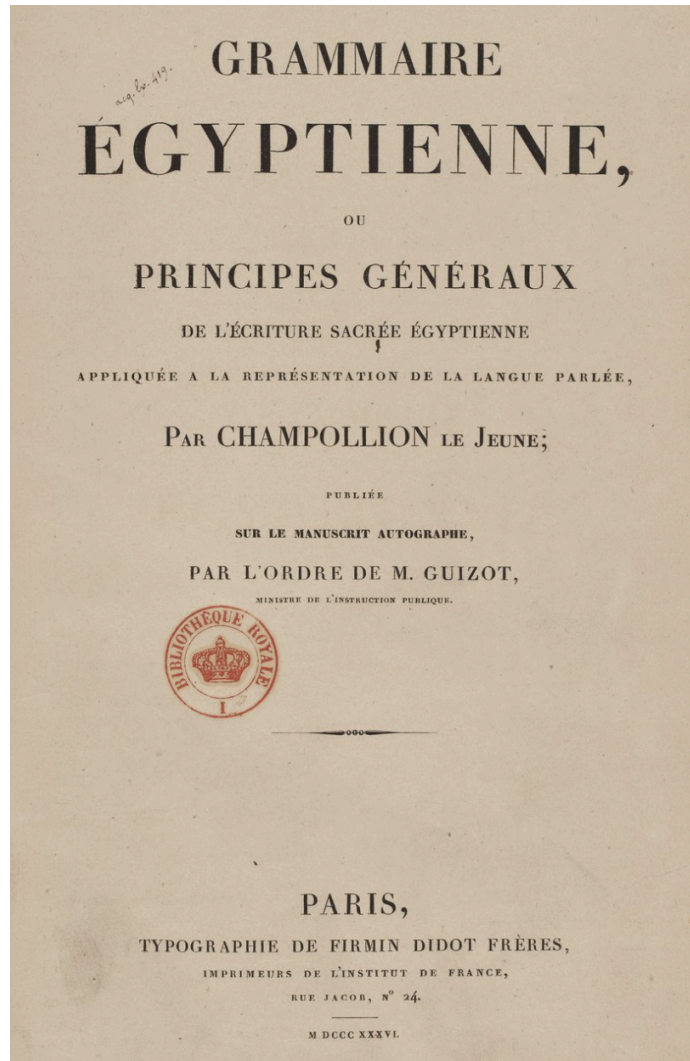

# The functions of hieroglyphic signs

Champollion (1790-1832)

- 1822
- 1824
- 1836

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Lettre à M. Dacier* (1822)
- *Précis du système hiéroglyphique* (1824)
- *Grammaire égyptienne* (1836, p. 22, §48)
  - Champollion still distinguishes three classes of hieroglyphic signs:  
“1° Les caractères *mimiques* ou **FIGURATIFS** ; 2° Les caractères *tropiques* ou **SYMBOLIQUES** ; 3° Les caractères *phonétiques* ou **SIGNES DE SON.**”
  - The conceptualization and definition of the category *Ideogram* changes

## ■ *Grammaire égyptienne* (1836, p. 48, §68-70)

### § II. LECTURE DES SIGNES.

68. Puisque la plus grande portion de tout texte hiéroglyphique consiste en signes phonétiques, l'écriture sacrée fut en liaison directe avec la langue parlée, car la plupart des signes de l'écriture représentaient les sons de la langue orale.

69. La même liaison, mais moins directe, exista également entre la langue parlée et les caractères *figuratifs* ou *mimiques*, parce que chacun d'eux répondait à un mot de la langue, signe oral de l'objet dont le caractère présentait l'image; le *mot* devait donc habituellement servir de prononciation au caractère *image* : ainsi,

LE CARACTÈRE		SE PRONONÇAIT
	Nourrice,	мддпн.
	Enfant,	си.
	Homme,	ршмє.
	Femme,	єшмє.
	Lèvres,	спотот.
	Mamelles,	шпот.
	Doigt,	тнѣ.

70. Il en fut de même quant aux caractères *tropiques* ou *symboliques* : on attacha, pour ainsi dire, à chacun de ces signes un *mot* de la langue parlée, exprimant par le *son* précisément la même *idée* que le caractère rappelait, soit par synecdoche, soit par métonymie, ou au moyen d'une métaphore.

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Grammaire égyptienne* (1836, p. 109, §111)

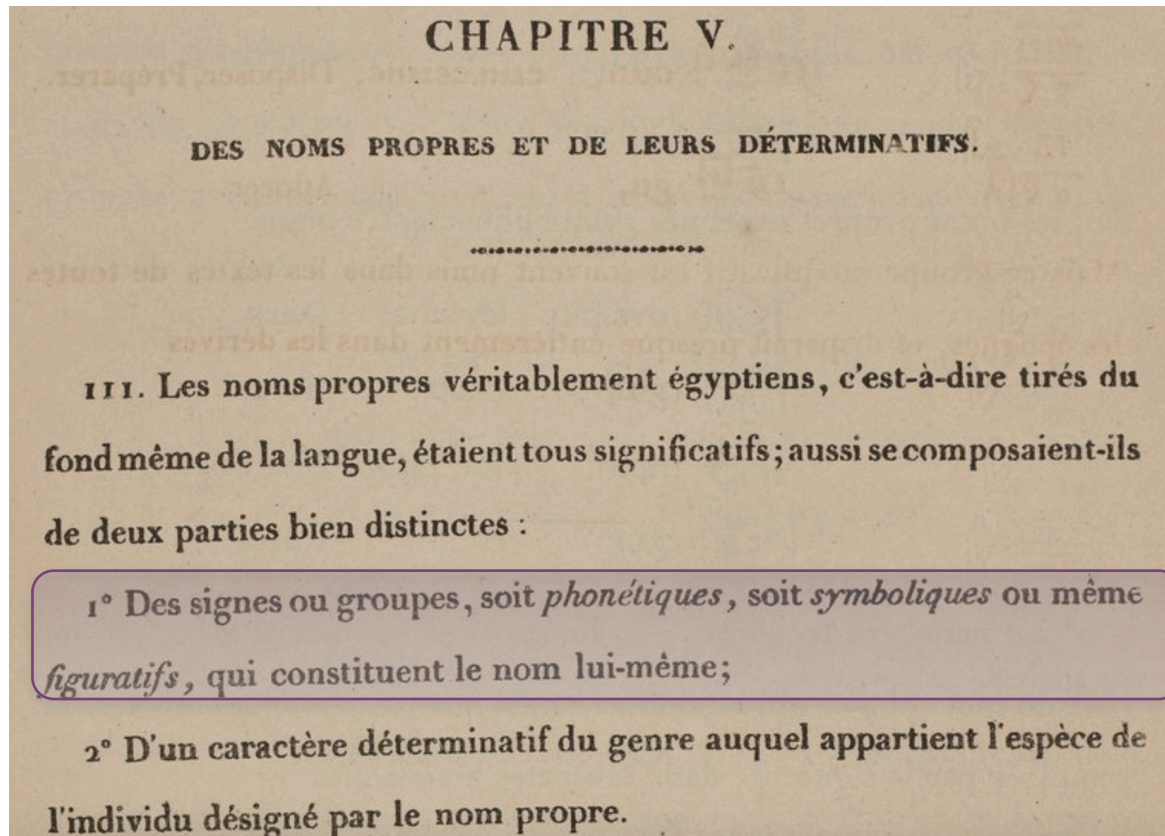

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Grammaire égyptienne* (1836, p. 109, §111)

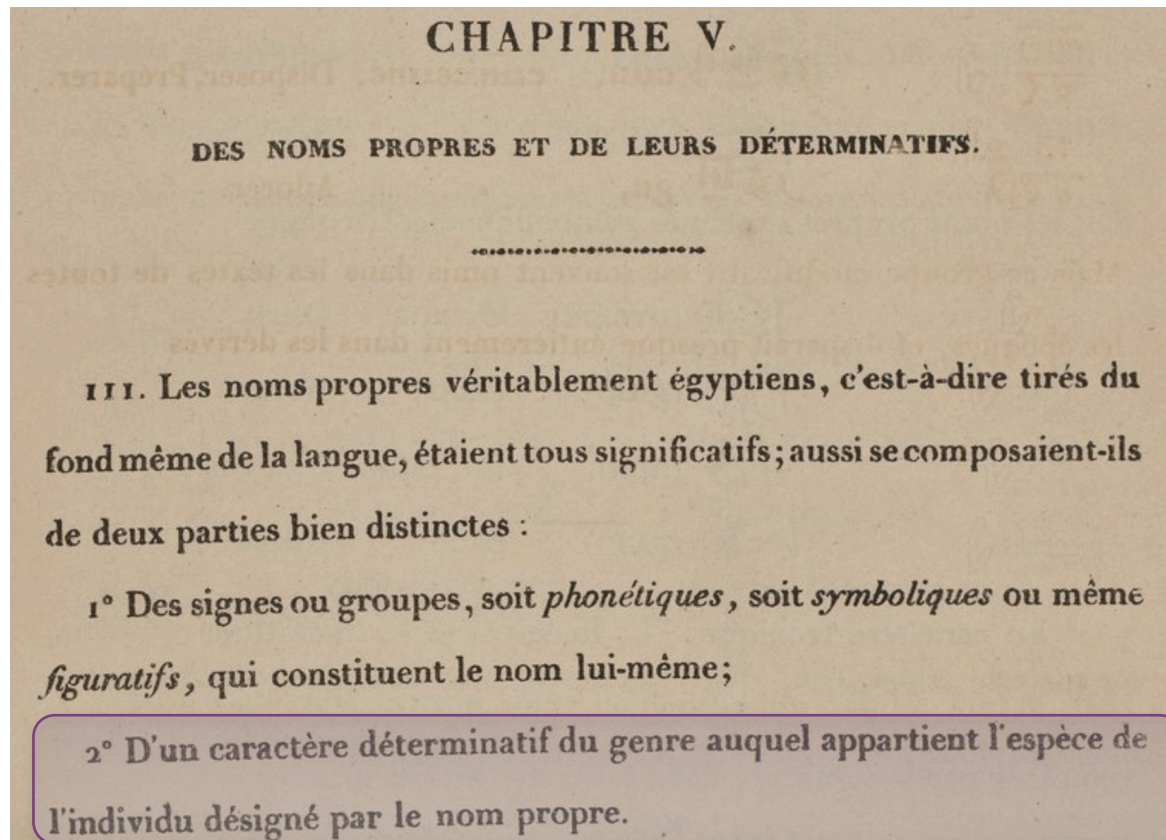

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Grammaire égyptienne* (1836, p. 109, §111)

# The functions of hieroglyphic signs

Champollion (1790-1832)

- *Grammaire égyptienne* (1836)
  - Champollion distinguishes between two functions:
    - Hieroglyphs that have a phonetic value [+signifier]
    - Hieroglyphs that have refer to some content [+signified] and, hence, are linked to a given phonetic realization [+signifier]
  - He makes a distinction between two parts in Egyptian words:
    - The signs forming the word itself (phonetic, figurative and symbolic signs)
    - The “déterminatif” that gives an indication about the type/genre to which the (proper) name belongs
  - Both the *paradigmatic* and *syntagmatic* dimensions are taken into account

# Outline of the talk

- Historical approach:  
The functions of hieroglyphic signs
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - **The dual view (Sethe, Gardiner, etc.)**
  - A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)
  - Schenkel's square of hieroglyphic functions (and Kammerzell's revision)
  - Morenz' tree of hieroglyphic functions

# The functions of hieroglyphic signs

## The dual view

- K. Sethe
  - 1908. Zur Reform der ägyptischen Schriftlehre, in: *Zeitschrift für Ägyptische Sprache und Altertumskunde* 45, 36-43.
  - †1935. *Das hieroglyphische Schriftsystem: ein Vortrag*, Glückstadt-Hamburg, J.J. Augustin (= *Leipziger Ägyptologische Studien* 3).
  
- A.H. Gardiner
  - 1957, p. 8, §6: “[e]ven in the fully developed form of hieroglyphic writing only two classes of signs need be clearly distinguished. These are: (1) sense-signs or ideograms (Greek *idea* ‘form’ and *gramma* ‘writing’); (2) sound-signs or phonograms (Greek *phonē* ‘sound’ and *gramma* ‘writing’).”
  
- J. Allen
  - 2000
  - Etc.

# The functions of hieroglyphic signs

## The dual view

### ■ Principle

- [+signified] vs. [+signifier]

<i>Graphemic signifier</i>	
“Ideogram”	“Phonogram”
[+signified]	[+signifier]

“Proper”	“Determinative”
[-end]	[+end]

### ■ Implications

- Close to the description in Champollion’s *Précis* (1824) without reference to the fact that the “ideograms” do also refer to some phonetic shape.
- But, the syntagmatic dimension allows to acknowledge two categories of signs (informally “end of the word”).

# Outline of the talk

- Historical approach:  
The functions of hieroglyphic signs
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - The dual view (Sethe, Gardiner, etc.)
  - **A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)**
  - Schenkel's square of hieroglyphic functions (and Kammerzell's revision)
  - Morenz' tree of hieroglyphic functions

# The functions of hieroglyphic signs

A triadic organization of sign functions

- A. Erman
- P. Kaplony
- P. Vernus
- J. Winand
- Etc.

# The functions of hieroglyphic signs

## A triadic organization of sign functions

### ■ Principle

#### ■ Combination of two features

- $[\pm \text{MEANING}]$  and  $[\pm \text{SOUND}] \Rightarrow$  Four logical categories

	MEANING	SOUND
Phonogram	-	+
Logogram/ Ideogram	+	+
Classifier/ Determinative	+	-

[house] - /pr/

# The functions of hieroglyphic signs

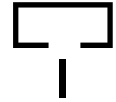

## A triadic organization of sign functions

### ■ Principle

#### ■ Combination of two features

- $[\pm \text{MEANING}]$  and  $[\pm \text{SOUND}] \Rightarrow$  Four logical categories

	MEANING	SOUND		
Phonogram	-	+		/pr/ (in <i>pri</i> 'to go out')
Logogram/ Ideogram	+	+		[house] - /pr/
Classifier/ Determinative	+	-		

# The functions of hieroglyphic signs

## A triadic organization of sign functions

### ■ Principle

#### ■ Combination of two features

- [ $\pm$  MEANING] and [ $\pm$  SOUND]  $\Rightarrow$  Four logical categories

	MEANING	SOUND
Phonogram	-	+
Logogram/ Ideogram	+	+
Classifier/ Determinative	+	-

/pr/ (in *pri* 'to go out')

[house] - /pr/

[building] (in *ḥ.t* 'room')

# The functions of hieroglyphic signs

A triadic organization of sign functions

## ■ Principle

### ■ Combination of two features

■  $[\pm \text{MEANING}]$  and  $[\pm \text{SOUND}] \Rightarrow$  Four logical categories

### ■ Implications

■ Close to the description in Champollion's *Grammar* (1836), because it acknowledges the phonemic dimension of the ideograms.

■ The syntagmatic dimension is completely lacking.

## Outline of the talk

- Historical approach:  
The functions of hieroglyphic signs
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - The dual view (Sethe, Gardiner, etc.)
  - A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)
  - **Schenkel's square of hieroglyphic functions (and Kammerzell's revision)**
  - Morenz' tree of hieroglyphic functions

# The functions of hieroglyphic signs

## Schenkel's square of hieroglyphic functions

- It was Schenkel who most clearly and systematically drew attention to this syntagmatic dimension — as part of the spatial configuration of the script — when he introduced the notion of “*Assoziogramm*” (1971) and later made the distinction between uses of graphemic signifiers als “*Notation*” or “*Kennzeichnung*” (1984; 1994; 2003).
- This distinction allows him to make a distinction between
  - *Notation*: the autonomous uses of hieroglyphic signs, which as ideograms/logograms or phonograms refer directly to the *linguistic sign*
  - *Kennzeichnung*: the use of hieroglyphs as a means of disambiguating or refining the meaning (determinatives) or reading (phonetic complements) of *other graphemes* in the word or phrase to which they belong.

# The functions of hieroglyphic signs

## Schenkel's square of hieroglyphic functions

### ■ Schenkel (1994)

- Notation vs Kennzeichnung (syntagmatic dimension)
- Semogram [+signified] vs Phonogram [+signifier]

	Semogramm	Phonogramm
Als Notation	Logogramm oder Ideogramm	Phonogramm
Als Kennzeichnung	Determinativ	Komplement

### ■ Kammerzell (1998; 2004) – Lincke (2011) – Lincke & Kammerzell (2012)

	[+meaningful]	[-meaningful]
[+autonomous]	logograms (inaccurately: “ideograms”)	phonograms (in the narrower sense)
[-autonomous]	Classifiers (inaccurately: “determinatives”)	interpretants (“phonetic complements”)
	semograms	phonograms (in the wider sense)

# The functions of hieroglyphic signs

### ■ Implication

- Dual view + syntagmatic dimension

# The functions of hieroglyphic signs

## Schenkel's square of hieroglyphic functions

- Interim conclusions: a recurring issue is to acknowledge...
  - The fact that hieroglyphic signs are able to refer at the same time to
    - Units of 'first articulation', i.e. meaning (signified)
    - Units of 'second articulation', i.e. /sound/ (signifier)
  - The syntagmatic dimension
    - Logogram vs. classifier
    - Phonogram vs phonetic complement (or interpretant)

Champollion (1936) + Triadic model

Schenkel's square

# Outline of the talk

- **Historical approach:**  
The functions of hieroglyphic signs
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - The dual view (Sethe, Gardiner, etc.)
  - A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)
  - Schenkel's square of hieroglyphic functions (and Kammerzell's revision)
  - **Morenz' tree of hieroglyphic functions**

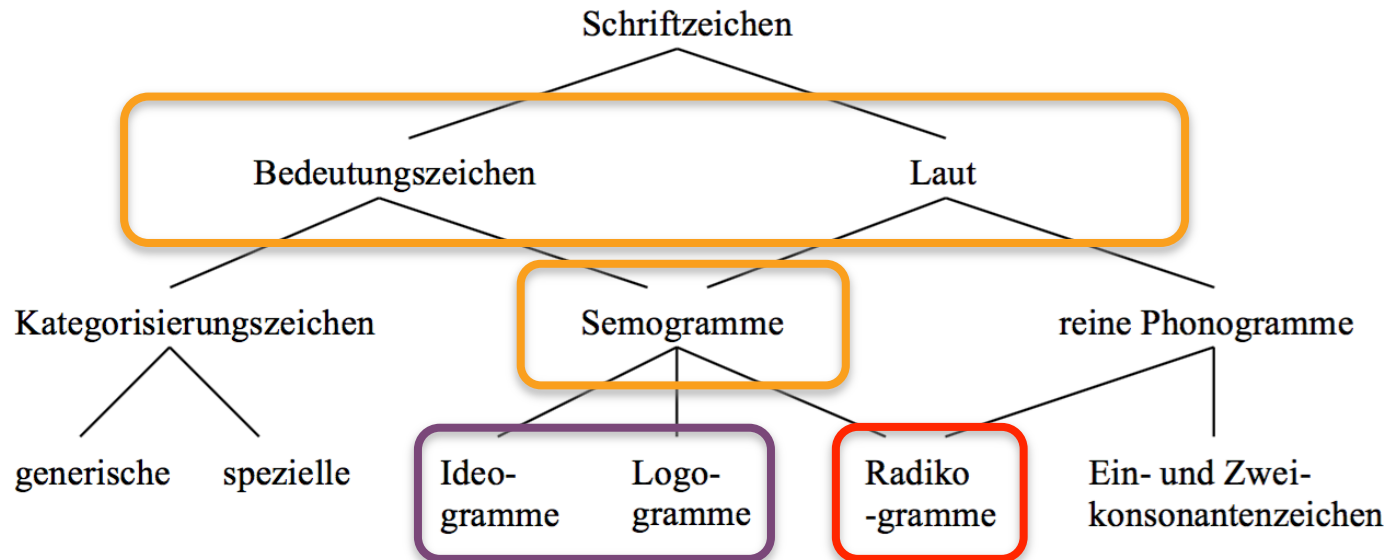

# The functions of hieroglyphic signs

## Morenz' tree of hieroglyphic functions

### ■ Morenz (2004)

- The goal is to introduce a kind of fluidity between broad semiotic categories such as semograms and phonograms that are not always easy to distinguish in practice (see Morenz 2004: 19, n. 64)

# The functions of hieroglyphic signs

## Morenz' tree of hieroglyphic functions

- Morenz (2004)
  - The goal is to introduce a kind of fluidity between broad semiotic categories such as semograms and phonograms that are not always easy to distinguish in practice (see Morenz 2004: 19, n. 64)
  - This approach can be systematized by integrating the syntagmatic dimension into this tree of functions

# Outline of the talk

- **Historical approach:  
The functions of hieroglyphic signs**
  - Ancient authors (Herodotus, Clement of Alexandria, Horapollo, ...)
  - The evolution of Champollion's description
  - The dual view (Sethe, Gardiner, etc.)
  - A triadic organization of sign functions (Erman, Kaplony, Vernus, Winand, etc.)
  - Schenkel's square of hieroglyphic functions (and Kammerzell's revision)
  - Morenz' tree of hieroglyphic functions
- **Towards a new taxonomy**
  - Combining the syntagmatic and paradigmatic dimensions
  - Definition of the categories and prototypical examples

# Towards a new taxonomy

## Combining paradigmatic and syntagmatic features

- For systematizing the description of the glottic functions of the hieroglyphic signs, it is enough to combine the relevant features identified above and to answer three questions (that correspond to three polar features): *in a given syntagmatic environment*,
  1. does the hieroglyphic sign (graphemic signifier) express some content [+SEMOGRAM] or not [-SEMOGRAM]?
  2. does it refer to some linguistic form [+PHONEMOGRAM] or not [-PHONEMOGRAM]?
  3. does this hieroglyphic sign function autonomously [+AUTONOMOUS] in the written word (i.e., Schenkel's schematogram), or does it make sense *in relation* to other graphemes or signified [-AUTONOMOUS]?

# + Towards a new taxonomy

## Combining paradigmatic and syntagmatic features

- The first two features define 6 classes on the paradigmatic axis

[+SEMOGRAM]		[-SEMOGRAM]
1	2	3
[-PHONEMOGRAM]		[+PHONEMOGRAM]

- And we end up with 6 classes when one adds the syntagmatic dimension

	[+SEMOGRAM]		[-SEMOGRAM]
[-RELATIONAL]	1	2	3
[+RELATIONAL]	4	5	6
	[-PHONEMOGRAM]		[+PHONEMOGRAM]

# Towards a new taxonomy

  - Definition of the categories and prototypical examples
- **Categorization and fluidity**
  - Pictograms in action
  - Logograms other semograms
  - Phonograms and radicograms

# Categorization and fluidity

## Exploring the borders

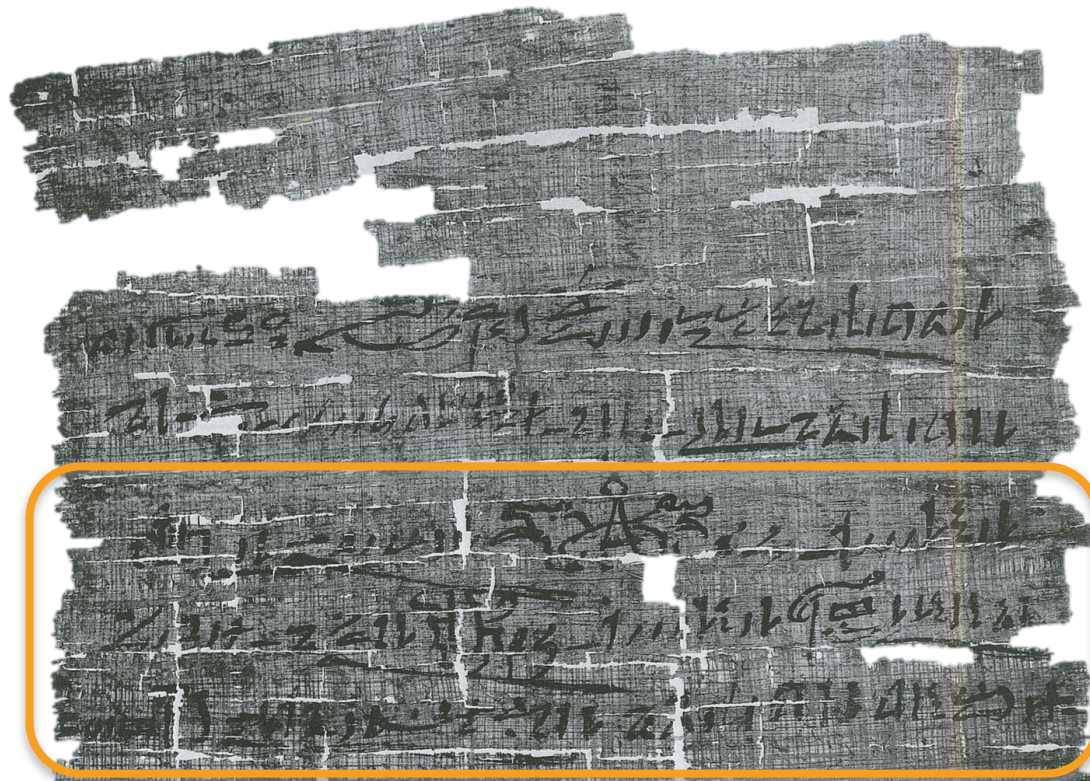

- The goal here is to confront the admittedly *etic* semiotic categorization of this modern taxonomy with empirical gradience. Indeed, as argued by Loprieno (2003a), the *emic* “iconocentrism” characteristic of the ancient Egyptian culture mediates between the semographic and phomegraphic realms, blurring the boundaries of our modern classifications.

# Categorization and fluidity

## Pictograms in action

- Pictograms can be fully integrated within the writing system, even in the admittedly less iconic types of cursive hieratic, see e.g. P. BM EA 10411, v<sup>o</sup> 3-5 = *LRLC* pl. 4

# Categorization and fluidity

## Pictograms in action

- Pictograms can be fully integrated within the writing system, even in the admittedly less iconic types of cursive hieratic, see e.g. P. BM EA 10411, v<sup>o</sup> 3-5 = *LRLC* pl. 4

# Categorization and fluidity

## Pictograms in action

- Pictograms can be fully integrated within the writing system, even in the admittedly less iconic types of cursive hieratic, see e.g. P. BM EA 10411, v<sup>o</sup> 3-5 = *LRLC* pl. 4

“Regarding the matter of **the hippopotamus amulet** that I gave you when you were about to go southward (mentioned) in your letter, (and) regarding the case of the **double-crown amulet** about which you said to me ‘is it lost or is it in your possession?’, in it, ‘write to me!’; it is on the first month of Shemou, day 2 that I made them (i.e. the amulets) come to you.”

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)
- The same applies to the distinction between logograms and classifiers
  - Consider the most common spelling

- Should we describe it,
  1. as a logographic spelling *rmt* () with two phonemographic interpretants, *r* () and *t* ()?
  2. as a (defective) phonemographic spelling (), with the classifier  showing that this word refers to a group of human animates?

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)
- The same applies to the distinction between logograms and classifiers
  - Consider the most common spelling

- The two answers are possible  $\Rightarrow$  diachronic gradience
  1. Lacau (1913: 7-11) argued that, originally, the sign-group was used as a logogram for the lexeme *rmt* “people” (e.g. *Urk.* I, 57, 15 & 16; tomb of *Sšm-nfr*, late V<sup>th</sup> dynasty); in the biography of Metjen, the logographic plural is attested: (*Urk.* I, 3,9).
  2. In a second step, some of its consonants were written out — but only those needed to avoid an ambiguity and ideally fitting within the space for a group or “quadrat” (Lacau 1913: 8-9) —, which led to the spelling .
  3. Approximately at the same time, however, the sign-group is used as a classifier in the spelling of other lexemes referring to human animates, such as *msw* “children” (*Urk.* I, 41,9; tomb of *Pth-wšš*, V<sup>th</sup> dynasty) or *hm-k3* “funerary priest” (e.g. *Urk.* I, 11,11; IV<sup>th</sup> dynasty). The paradigm that emerges thus makes the second analysis suggested above likely at this point.

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)
- Logograms and Classifiers in synchrony: *mnjw* “herdsman” (*Wb.* II, 74,15-75,6)

- Usual spelling  the man with a stick and a bundle on the shoulder (A33) classifies the lexeme *mnjw* “herdsman” in the category of [WANDERER]

- In the Kanais inscription, one finds the logographic spelling  in a common epithet that describes

king Seti I as being a *mnjw nfr s<sup>c</sup>nh mš<sup>c</sup>=f*, a “good shepherd, who keeps his army alive”. In the context of the Kanais inscription — in which Seti I is praised not only for having built a temple but, most importantly, for having “excavated a well in front of it”. This very specific writing of the lexeme *mnjw*, with a man carrying both goods and water, refer — crucially in this context — to his ability to provide water to his army.

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)
- Logograms and Classifiers (*rmt* “people” and *mniw* “herdsman”)
- Logograms and Radicograms:  in lexemes related to [ROWING]

*mhn.t* “ferry boat”

*hni* “to row”

*hn.t*  
“water procession”

*hnw* “oarsman”

*hnn* “to agitate”

*hnnw* “brawler”

(like water agitated with a paddle)

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)

- Logograms and Classifiers (*rmt* “people” and *mniw* “herdsman”)

- Logograms and Radicograms:  in lexemes related to [ROWING]

- Complementarity: *mhn.t* “ferry boat” in Boston Stela MFA 23733 (= *Urk.* IV, 1241,17)

- Enriching radicograms iconically: *hni* “to convey by water” in P. Leiden 348, v° 9,1 (= *LEM* 135,13)

- In this spelling, the radicogram is “logogramatized”, so to speak, with the oarsman fully depicted and rowing in the water sign that functions both iconically and as a phonogram for *n*.

# Categorization and fluidity

## Logograms and other types of semograms

- Logograms and Pictograms (St. Louvre C14)
- Logograms and Classifiers (*rm̄t* “people” and *mniw* “herdsman”)
- Logograms and Radicograms (*hn* [rowing])

# Categorization and fluidity

## Phonograms and radicograms

### ■ Blurred boundaries between phonograms and radicograms

-  *mi* (a milk jug carried in a net; W19): its uses in words like *mj* “as”, *mjw* “cat”, *dmj* “town” show that it has no other value there than a phonemographic one.

-  *gm* (flamingo; G28). However, mostly attested in lexemes referring to the notion of [ENCOUNTERING] and of [TRITURATION], while generally avoided in other lexemes, such as  “temporal bone” (“Joch-Schlafenbein”; *Wb.* V, 170,2).

-  is probably not merely a phonogram for *sš*, since it occurs always in words that have to do, in one way or another, with [WRITING] ⇒ Radicogram

# Conclusions
