PH3C

Primary Health Care Classification Consortium — Edit

The PH3C supports the activity of the Wonca International Classification Committee (WICC) and his website.

This site gives access to the work published by the Committee since his creation in 1972. It will mostly provide information about the International Classification of Primary Care but also about other tools dealing with information retrieval in Primary Care.

The name "Primary Health Care Classification Consortium" has been chosen to support Wonca and WICC efforts in this domain, to diffuse information about WICC work, to gather people using WICC tools, to share research and field trials results and to seek support from all interested parties.

The website is also the main communication tool between WICC members. More than 50 members from 30 countries can communicate through a reserved access.

All about WICC

Ravello meeting 2012 : Lucs, Slides and countries annual reports

In 2012 the yearly meeting of the WICC took place in Ravello, Italy. Main topics of the meeting were the results of the different working groups, the future of WICC with visit of ICPC by the primary care investigation network (PCIN), the suggested revision of ICPC-2 and the ICPC-2 translation group. There were intensive discussions about the future directions of the WICC and always fruitful exchanges between the members during breaks and dinners. Each of the working groups had the opportunity to present the work in progress and to receive comments from all of the world colleagues. Besides the work in progress reports and discussions, there was enough time to network, to get to know the people behind the WICC and to share ideas with them. The next meeting will be held in Prague, Czech Republic, in conjunction with the WONCA world conference 2013. Please contact us if you have any questions.

The quaternary prevention concept has been endorsed by WICC

During the WICC annual meeting in Durham, North Carolina in 1999, the Wonca International Classification Committee has endorsed the Quaternary prevention concept, which the motto is First do not harm.
The Quaternary prevention concept has been defined during the meeting and added to the Wonca Dictionary of General Practice.
