Contents

PREFACE	VII
BIBLIOGRAPHY	XI
1. Influence of Internal Damping on Aircraft Resonance	1
2. Upper and Lower Bounds in Matrix Structural Analysis	53
3. Displacement and Equilibrium Models in the Finite Element Method	101
4. Variational Principles in Fluid Mechanics	169
5. Strain-Energy Bounds in Finite-Element Analysis by Slab Analogy	191
6. A Conforming Finite Element for Plate Bending	219
7. An Equilibrium Model for Plate Bending	239
8. The Theoretical Design Laws of Warping-Free Multicellular Box Beams	271
9. The Dual Principles of Elastodynamics. Finite Element Applications	295
10. Dual Analysis by Finite Elements. Linear and Non Linear Applications, Part II - Non Linear Theories - Non Linear Shell Theory	321
11. Dual Analysis for Heat Conduction Problems by Finite Elements	447
12. A New Variational Principle for Finite Elastic Displacements	479
13. Matrix Structural Analysis	509
14. Diffusive Equilibrium Models	569
15. Variational Principles and the Patch Test	629
16. Stress Function Approach	663
17. The Dynamics of Flexible Bodies	717
