

## An institutional repository to promote open access

# Classic publication process

# Fair Gold model

**Hybrid journals = double dipping**

**Predatory publishers = fraud**

Only 30% of OA journals ask for Article Processing Charge (APC)

A wide-angle photograph of a lush green agricultural field, likely a crop field, stretching towards a line of trees under a clear blue sky. The crops are arranged in neat rows, and the overall scene is bright and vibrant. The text "Green first !" is overlaid in the center of the image.

# Open Repository and Bibliography

1 system, 2 purposes

Complete institutional bibliography

Open Access repository

Deposit completely made by ULiège authors (\*)

ORBi staff develops, improves the system, adds functionalities, informs, instructs, promotes...

BUT doesn't archive ANY reference

*(\*) maybe helped by a representative*

**Main  
specificities**

Respect of each actor  
(author, publisher, institution)

Open Access if possible

or

Restricted Access → request print

ULiège Mandate

...or how to go beyond the anecdotal...

# ULiège – institutional mandate

**It is mandatory for every member of the University of Liège to add in ORBi**

- ✓ Bibliographic reference of scientific publications and communications upon acceptance by the publisher
- ✓ Full text for each scientific article published since 2002
- ✓ Every doctoral thesis must be added to ORBi PRIOR its defense at the ULiège, and joined by all or part of the full text, with at least the abstract and the table of contents

The level of access is determined by the authors in respect of the publisher's policy and with the co-authors agreement

*Only the publications on ORBi will be considered for evaluations or internal procedures by the ULiège or FRS-FNRS*

*if it's not on ORBi, it does not exist*
