Q-Codes HeTOP page & Hierarchy

Welcome to the Q-Codes repository at Rouen University Hospital

- Q-Codes are intended for indexing Family medicine related documentation jointly with the International Classification of Primary Care (ICPC). Both form the Core Content Classification in General Practice/ Family Medicine (3CGP)
- To search into Q-Codes, type a term, an acronym or a Q-Code into the search box: i.e. QD, sdm, QP51, continuity of care
- More information on Q-Codes http://3CGP.docpatient.net and ICPC: www.ph3c.org. The pages on 3CGP are prepared in such a way you will understand how use 3CGP (ICPC + Q-Code), share your experiences and thoughts and make comments for further development of Q-Codes.
- More information about the potentialities of the HeTOP server and the numerous terminologies and mappings available; see here Exploring HeTOP and ICPC-2 on HeTOP.

Warning:
ICPC is a Wonca product, free use for research, for any commercial use, refer to ceo@wonca.net Q-Codes is distributed in Creative Common share alike non-commercial use. For any commercial use refer to marc.jamoulle@gmail.com
