

IMA Commission on New Minerals, Nomenclature and Classification (CNMNC)

Newsletter 53

Ritsuro Miyawaki (Chairman CNMNC)¹, Frédéric Hatert (Vice-Chairman CNMNC)², Marco Pasero (Vice-Chairman CNMNC)^{3*} and Stuart J. Mills (Secretary CNMNC)⁴

¹ Department of Geology and Paleontology, National Museum of Nature and Science, 4-1-1 Amakubo, Tsukuba 305-0005, Japan – miyawaki@kahaku.go.jp;

² Laboratoire de Minéralogie, Université de Liège, B-4000 Liège, Belgium – fhater@uliege.be; ³ Dipartimento di Scienze della Terra, Università di Pisa, Via Santa Maria 53, I-56126 Pisa, Italy – marco.pasero@unipi.it; and ⁴ Geosciences, Museums Victoria, PO Box 666, Melbourne, Victoria 3001, Australia – smills@museum.vic.gov.au

The information given here is provided by the IMA Commission on New Minerals, Nomenclature and Classification for comparative purposes and as a service to mineralogists working on new species.

Each mineral is described in the following format:

Mineral name, if the authors agree on its release prior to the full description appearing in press

Chemical formula

Type locality

Full authorship of proposal

E-mail address of corresponding author

Relationship to other minerals

Crystal system, Space group; Structure determined, yes or no

Unit-cell parameters

Strongest lines in the powder X-ray diffraction pattern

Type specimen repository and specimen number

Citation details for the mineral prior to publication of full description

Citation details concern the fact that this information will be published in the *Mineralogical Magazine* on a routine basis, as well as being added month by month to the Commission's web site.

It is still a requirement for the authors to publish a full description of the new mineral.

NO OTHER INFORMATION WILL BE RELEASED BY THE COMMISSION

NEW MINERAL PROPOSALS APPROVED IN DECEMBER 2019

IMA No. 2019-082

Dutrowite

Fornovolasco metarhyolite formation, close to the Boscaccio locality, Fornovolasco, Fabbriche di Vergemoli (LU), Apuan Alps, Tuscany, Italy (44°01'53"N, 10°22'11"E)

Cristian Biagioni*, Ferdinando Bosi, Daniela Mauro, Henrik Skogby, Andrea Dini and Federica Zaccarini

*E-mail: cristian.biagioni@unipi.it

Tourmaline supergroup

Trigonal: $R\bar{3}m$; structure determined

$a = 15.9864(8)$, $c = 7.2187(4)$ Å

6.40(42), 4.61(18), 4.24(52), 4.00(60), 2.971(61), 2.585(100), 2.048(41), 1.925(24)

Type material is deposited in the mineralogical collections of the Museo di Storia Naturale, Università di Pisa, Via Roma 79, Calci (PI), Italy, catalogue number 19890

NOMENCLATURE/CLASSIFICATION PROPOSALS APPROVED IN DECEMBER 2019

IMA 19-G: discreditation of ferrotellurite

Proposal 19-G is accepted, and the ill-defined mineral ferrotellurite is discredited. Indeed, this species has been shown to be equivalent to keystoneite, $Mg_{0.5}NiFe^{3+}(Te^{4+}O_3)_3 \cdot 4.5H_2O$.

IMA 19-H: discreditation of heliophyllite

Proposal 19-H is accepted, and heliophyllite is discredited. This species is identical to ecdemite, $Pb_6As_2O_7Cl_4$.

REVISED CHEMICAL FORMULA

A paper on the mineral ilmajokite has been recently published [*IUCr*], 7 (2020), 121–128] in which the ideal chemical formula of the mineral is given as $Na_{11}KBaCe_2Ti_{12}Si_{37.5}O_{94}(OH)_{31} \cdot 29H_2O$. With respect to the previously accepted formula, there is a new chemical element (K); moreover Ba and Ce, which were previously put together with Na as subordinate cations, now acquire the status of species-forming constituents, as the structural study clearly indicates that they are partitioned at specific crystallographic sites. These data were examined carefully by the CNMNC officers and were considered reliable. Accordingly it was agreed to modify the formula of the mineral in the official IMA List of Minerals. Moreover, the occurrence of a REE as a species-forming element implies the renaming of ilmajokite to ilmajokite-(Ce).

ERRATUM

The file on the new mineral petrovite in CNMNC Newsletter 52 was wrong in the following details: IMA No.; chemical formula; full authorship of proposal; unit-cell parameters; strongest lines in the X-ray powder diffraction pattern; citation details for the mineral prior to publication of full description. Here is the correct version.

IMA No. 2018-149b

Petrovite

$Na_6Cu(SO_4)_4$

Second scoria cone of the Northern Breakthrough of the Great Tolbachik fissure eruption, Tolbachik volcano, Kamchatka, Far-Eastern Region, Russia (55°41'N, 160°14'E, 1200 m asl)
