Des titres d'Alma qui sont "outside of BrowZine" ne sont pas accessibles via les catégories :

- Arm@rium Universitatis Leodiensis
- Cahiers de l'Institut du moyen-âge grec et latin
- Mélanges de l'Ecole française de Rome. Moyen âge
- Mélanges de l'école française de Rome. Moyen âge - Temps modernes
- Mittelalter : Zeitschrift des Schweizerischen Burgenvereins
- Perspectives Médiévales : Revue d'Épistémologie des Langues et Littératures du Moyen Âge
- ...

Taxonomie

- ▶ voulue pour être la plus générale possible (contexte académique)
- ▶ tenant compte des titres des éditeurs
- ▶ vivante, flexible et extensible si besoin
- ▶ basée et inspirée par des taxonomies existantes (*National Academies' Taxonomy of Fields, National Center of Education Statistics Classification of Instructional Programs, Berkeley Press 2011 Taxonomy of Academic Programs, Library of Congress classification...*)
- ▶ non adaptable par le client, mais on peut demander à masquer une discipline de niveau 1
- ▶ alternative : *Medical Taxonomy*

<https://support.thirdiron.com/knowledgebase/articles/185354-about-the-browzine-taxonomy>

Périodiques par catégorie via Primo ?

- ▶ Possibilité de découverte des périodiques par catégorie
- ▶ Catégories de la *Hierarchical Interface to LC Classification* ([HILCC](#)) de Columbia
 - non modifiable, mais libellés personnalisables
- ▶ Mapping du base de la valeur en 050 (LCC)
- ▶ Potentiellement tous les périodiques papier et électroniques d'Alma
 - BrowZine uniquement titres académiques avec DOI
 - enrichissement des données Alma
 - via le service OCLC dans MarcEdit: Ajout de 050, de 082 et de vedette FAST (*Faceted Application of Subject Terminology*) dans des milliers de notices Alma
 - manuellement (titres majeurs) ?

The screenshot displays the BrowZine Library interface. At the top, a dark navigation bar contains the following elements:

- Navigation links: [BrowZine Library](#), [My Bookshelf](#), and [My Articles](#). The [My Bookshelf](#) and [My Articles](#) links are highlighted with red boxes.
- Access information: "Access Provided By University of Liège".
- Utility icons: A help icon (question mark), a mobile app icon (phone), a settings icon (gear), and a search icon (magnifying glass). The mobile app icon is highlighted with a red box.

The main content area is split into two columns:

- Left Column (Journal Details):**
 - Journal cover: "APPLIED MATHEMATICS".
 - Back link: "← Back to Journals".
 - SJR value: "SJR: 0.688" (highlighted with a red box).
 - Journal title: "Advances in Applied Mathematics".
 - Action button: "ADD TO MY BOOKSHELF" (highlighted with a red box).
 - Section header: "NEW ARTICLES".
 - Link: "Articles in Press".
- Right Column (Article List):**
 - Year: "2021".
 - Volume: "Vol. 127".
 - Article 1: "Equidistributions of mesh patterns of length two and Kitaev and Zhang's conjectures" (p. 102149 - Han, Bin; Zeng, Jiang). Below the title is a row of icons: document, link, folder, graduation cap, and share (all highlighted with a red box).
 - Article 2: "On a poset of trees revisited" (p. 102164 - Li, Shuchao; Yu, Yuantian). Below the title is a row of icons: document, link, folder, graduation cap, and share.
 - Article 3: "Cyclic flats of binary matroids" (p. 102165 - Freij-Hollanti, Ragnar; Grezet, Matthias; Hollanti, Camilla; ... Westerback, Thomas).

Indice SJR

- ▶ Indice SJR = SCImago Journal Rank
- ▶ mesure de l'influence scientifique de revues académiques qui tient compte
 - à la fois du nombre de citations obtenues par la revue et
 - de l'importance des journaux d'où proviennent ces citations
- ▶ développé en 2007 par le groupe de recherche SCImago (Espagne)
- ▶ pour être utilisé pour une large gamme de revues, notamment les non anglophones
- ▶ alternative au facteur d'impact
- ▶ gratuit

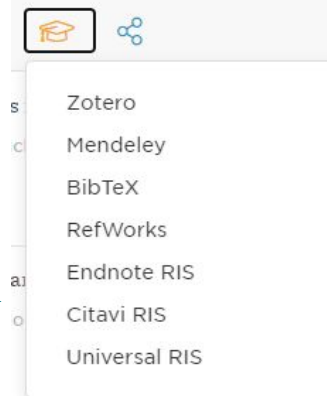

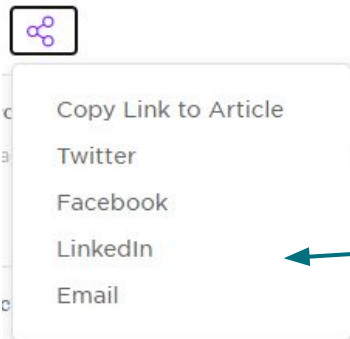

Boutons Actions

Equidistributions of mesh patterns of length two and Kitaev and Zhang's conjectures

p. 102149 - Han, Bin; Zeng, Jiang

A real-time attack defense framework for 5G network slicing

Michel Bonfim¹ | Marcelo Santos² | Kelvin Dias¹ | Stênio Fernandes¹

¹Centro de Informática (CIn), Universidade Federal de Pernambuco (UFPE), Recife-PE, Brazil

²Instituto Federal de Educação, Ciência e Tecnologia do Sertão Pernambucano (IF Sertão-PE), Salgueiro-PE, Brazil

Correspondence

Michel Bonfim, Centro de Informática (CIn), Universidade Federal de Pernambuco (UFPE), Av. Jornalista Anibal Fernandes, s/n, Cidade Universitária (Campus Recife), 50.740-560, Recife-PE, Brazil. Email: msb6@cin.ufpe.br

Summary

Network Slicing (NS) is a key enabler to support 5G network services on-demand. However, since NS is a result of the recent advancement in Software-Defined Networking and Network Function Virtualization, it introduces new security issues which include attacks against an NS instance within an operator network and interslice security threats. In this scenario, identifying and mitigating attacks in real-time is of paramount importance to improve security aspects. However, it is far from being straightforward. Therefore, this work proposes the FrameRTP4, a P4-based framework that aims to deliver real-time attack detection and mitigation mechanisms in 5G NS scenarios. For this, it provides a P4-based switch that implements a Service Function Chaining protocol layer, an efficient and scalable Access Control List for the detection and mitigation of known attacks, and a monitoring system aiming to reduce the overhead induced on the control channel. Furthermore, it delivers an orchestrator that aims to control all switches in order to enable lifecycle management of NS instances and P4 table rules. Besides, it also performs some autonomous tasks such as the wildcard rules generation and the detection of new threats by using machine learning algorithms. Preliminary results point to the potential benefit of FrameRTP4 to be part of a 5G NS infrastructure.

Abstract: In recent years, eBook collections have been increasing at a slow but steady rate in both public and academic libraries. With the increasing eBook collections in libraries and the advancements made in information discovering services, users can now discover materials existing outside of their local library more easily. EBooks also offer the potential for quick interlibrary loan delivery. Ironically, eBook interlibrary loan has not become prevalent in libraries. Many studies have been done to explore eBook licensing and interlibrary loan in academic libraries and to offer practical solutions for eBook interlibrary lending. Few studies have been done in public libraries. This study explores the current practice of eBook interlibrary loan activities in American public libraries. Survey questionnaires were distributed to 118 randomly selected public libraries. Questions focused on current eBook interlibrary loan best practices, issues, and obstacles in American public libraries. Findings from this study indicate eBook IL is not a priority for the surveyed public libraries, and the adoption rate of

Statistiques Q4 2019 -> Q4 2020

	Sessions	My Bookshelf Views	TOC Views	Full Text Downloads
Q4 2019	5.250	105	1.761	7.750
Q1 2020	10.399	115	1.970	15.683
Q2 2020	14.137	49	2.140	20.240
Q3 2020	9.035	44	1.033	11.981
Q4 2020	17.065	17	1.447	21.685

Sessions (BrowZine & LibKey)

Sessions measures the number of times Third Iron services have been initiated within a time window of 30 minutes. Additional interactions continue to extend this window and thus prolong the same session. After 30 minutes of inactivity, additional activity results in a new session.

My Bookshelf (BrowZine Only)

With BrowZine, users have the ability to create their own bookshelves to more easily find, follow, and read their favorite journal titles. My bookshelf measures which journals people are actively monitoring by recording the number of times a user has clicked on a journal to look at unread articles for that title along with the ISSN/EISSN of those titles. Thus, this is not a metric of the number of times that journal appears on all user's bookshelves, but instead denotes true interaction with that content in the BrowZine environment.

Table of Contents Viewed (BrowZine Only)

Scanning tables of contents is one of the primary ways researchers report how they stay current with research in their fields. BrowZine reports how many journal tables of contents have been viewed, providing a unique way to understand how users are benefiting from your collection. Both the journal's title and ISSN/EISSN are provided.

Full Text Download Requests (BrowZine & LibKey)

This statistic reports how many full text articles were linked via BrowZine and LibKey and from which journals, along with the ISSN/EISSN for each title. Please note that this download metric is not a COUNTER compliant metric as BrowZine is not a publisher and does not provide the full text for any journals, but instead links to publisher platforms to download the full text.

Usage de Q4 2019 à Q4 2020

My Bookshelf : les 15 titres les plus utilisés

Contributions to Mineralogy and Petrology	24
Science (AAAS)	19
Nature	14

Agenda

- ▶ BrowZine
- ▶ Suite LibKey
 - LibKey Discovery
 - LibKey Link
 - LibKey Nomad
 - LibKey.io
- ▶ Base de connaissance et données ULiège
- ▶ Statistiques
- ▶ **Amélioration & promotion**

Amélioration & promotion

- ▶ Modifier le nom “University of Liège” ?
- ▶ Ajouter un lien dans la bannière BrowZine ?
- ▶ Poursuivre l’intégration de LibKey Link dans d’autres outils ?
- ▶ Intégrer BrowZine, LibKey Nomad et LibKey.io dans vos formations ?
- ▶ Voter pour l’extension Safari de LibKey Nomad ?
- ▶ Ajouter et activer LibKey Nomad sur les PC publics des implantations ?
- ▶ Faire ajouter LibKey Nomad par défaut sur les PC achetés par l’ULiège (promotion et demande auprès des UDI) ?
- ▶ Améliorer la présentation de BrowZine sur le site web et/ou Primo ?
- ▶ Développer du matériel promotionnel ?
- ▶ Travailler sur une présentation par catégorie via Primo ?
- ▶ ...
