## OVERVIEW

---

### About this book:

**Remedies in EU Competition Law: Substance, Process and Policy** is an unparalleled book developed in collaboration with the College of Europe's Global Competition Law Centre (GCLC). Remedies, designed to correct the negative effects of anti-competitive activity in markets, are central to competition law enforcement and act as a benchmark against which the efficiency of the overall system can be measured. A dearth of coverage which looks at issues, such as mergers, antitrust and State aid, quite a few recent high-profile decisions and an increased focus on areas such as digital markets, have triggered the need for an authoritative and comprehensive guide such as this.

### What's in this book:

This exceptional book provides well-articulated and practical commentaries by leading experts from the GCLC's unique network which were originally presented at the 2019 GCLC annual conference. It elucidates topics under the following heads:

- objectives and limitations of remedies;
- types of remedies in competition law enforcement;
- implementation and process;
- *ex post* assessment of remedies and policy lessons; and

- national and international approaches.

The group of authors includes the Director-General of the European Commission's competition department, lawyers from major international firms, and well-known economists and academics specialising in competition law.
