

DeepIso

A global open database of stable isotope ratios and elemental contents for deep-sea ecosystems

Loïc N. Michel, James B. Bell, Stanislas F. Dubois, Gilles Lepoint, Karine Olu, William D. K. Reid, Jozée Sarrazin, Gauthier Schaal & Brian Hayden

IsoEcol Virtual Meeting, 19-21/05/2021. Contact: loicnmichel@gmail.com

DeepISO: context

- The use of **stable isotopes** as **ecological tracers** in **deep-sea** ecosystems dates back several decades, and they have been instrumental to many **key discoveries** about ecosystem functioning

NATURE VOL. 306 3 NOVEMBER 1983

LETTERS

Sulphur isotopic compositions of deep-sea hydrothermal vent animals

Brian Fry, Howard Gest & J. M. Hayes

484

Nature Vol. 289 5 February 1981

Low $^{15}\text{N}/^{14}\text{N}$ in hydrothermal vent animals: ecological implications

Greg H. Rau

616

Nature Vol. 293 22 October 1981

Bacterial symbionts and low $^{13}\text{C}/^{12}\text{C}$ ratios in tissues of Pogonophora indicate unusual nutrition and metabolism

**A. J. Southward^{*}, Eve C. Southward^{*}, P. R. Dando^{*}, G. H. Rau[†], H. Felbeck[‡]
& H. Flügel[§]**

DeepISO: context

- The use of **stable isotopes** as **ecological tracers** in **deep-sea** ecosystems dates back several decades, and they have been instrumental to many **key discoveries** about ecosystem functioning
- However, constraining sampling **logistics** commonly **limit** the temporal, spatial, or taxonomic **scope** of deep-sea studies
- Much is left to discover about factors **globally** influencing **food web structure** and **ecological interactions** in deep-sea ecosystems

DeepIso: context

- The use of **stable isotopes** as **ecological tracers** in **deep-sea** ecosystems dates back several decades, and they have been instrumental to many **key discoveries** about ecosystem functioning
- However, constraining sampling **logistics** commonly **limit** the temporal, spatial, or taxonomic **scope** of deep-sea studies
- Much is left to discover about factors **globally** influencing **food web structure** and **ecological interactions** in deep-sea ecosystems
- Goal: produce a **global**, easily discoverable, available and reusable **compilation** of **stable isotope ratios** and **elemental contents** in organisms from **deep-sea** ecosystems
- Provide the deep-sea community with an **open data analysis** tool that can be used in the context of future ecological research, and to help deep-sea researchers to **use stable isotope markers** at their **full efficiency**.

People: core working group

James B. Bell
CEFAS (UK)

Stanislas F. Dubois
Ifremer (FR)

Gilles Lepoint
Uliège (BE)

Karine Olu
Ifremer (FR)

William D. K. Reid
Newcastle U (UK)

Jozée Sarrazin
Ifremer (FR)

Gauthier Schaal
UBO (FR)

Brian Hayden
UNB (CA)

People: data contributors

DeepIso v1 (10/2020)

SEANOE Sea scientific open data edition

SEANOE

DeepIso - a global open database of stable isotope ratios and elemental contents for deep-sea ecosystems

Date 2020-10-22

Temporal extent 1989 -2018

Author(s) Michel Loïc N. ¹, Bell James B. ², Dubois Stanislas F. ³, Le Pans Mathilde¹, Lepoint Gilles ⁴, Olu Karine ¹, Reid William D. K. ⁵, Sarrazin Jozee ¹, Schaal Gauthier ⁶, Hayden Brian ⁷

Contributor(s) Carlier Antoine ¹, Demopoulos Amanda W. J. ¹, Marticorena Julien ¹, McClain-Counts Jennifer P. ¹, Methou Pierre ¹, Parzanini Camilla ¹, Pradillon Florence ¹, Puccinelli Eleonora ¹, Riekenberg Philip M. ¹, Van Audenhaege Loïc ¹, Van Dover Cindy Lee ¹, Van Oevelen Dick ¹, Woulds Clare ¹

 DATA

Example of targeted taxa: tubeworms *Escarpia southwardae* and mussels *Bathymodiolus* aff. boomerang from cold seeps.

Picture: Ifremer, WACS cruise, 2011 (depth: 3160 m).

Freely available at <https://doi.org/10.17882/76595> under CC-BY licence

DeepIso v1

18677 measurements of 7 parameters

DeepIso v1

4378 distinct samples

Hydrothermal vent

Benthic deep-sea

Cold seep

Pelagic deep-sea

Cold water coral reef

DeepIso v1

4378 samples belonging to 493 taxa (+ sediments, suspended particulate organic matter, detritus)

Arthropoda

Mollusca

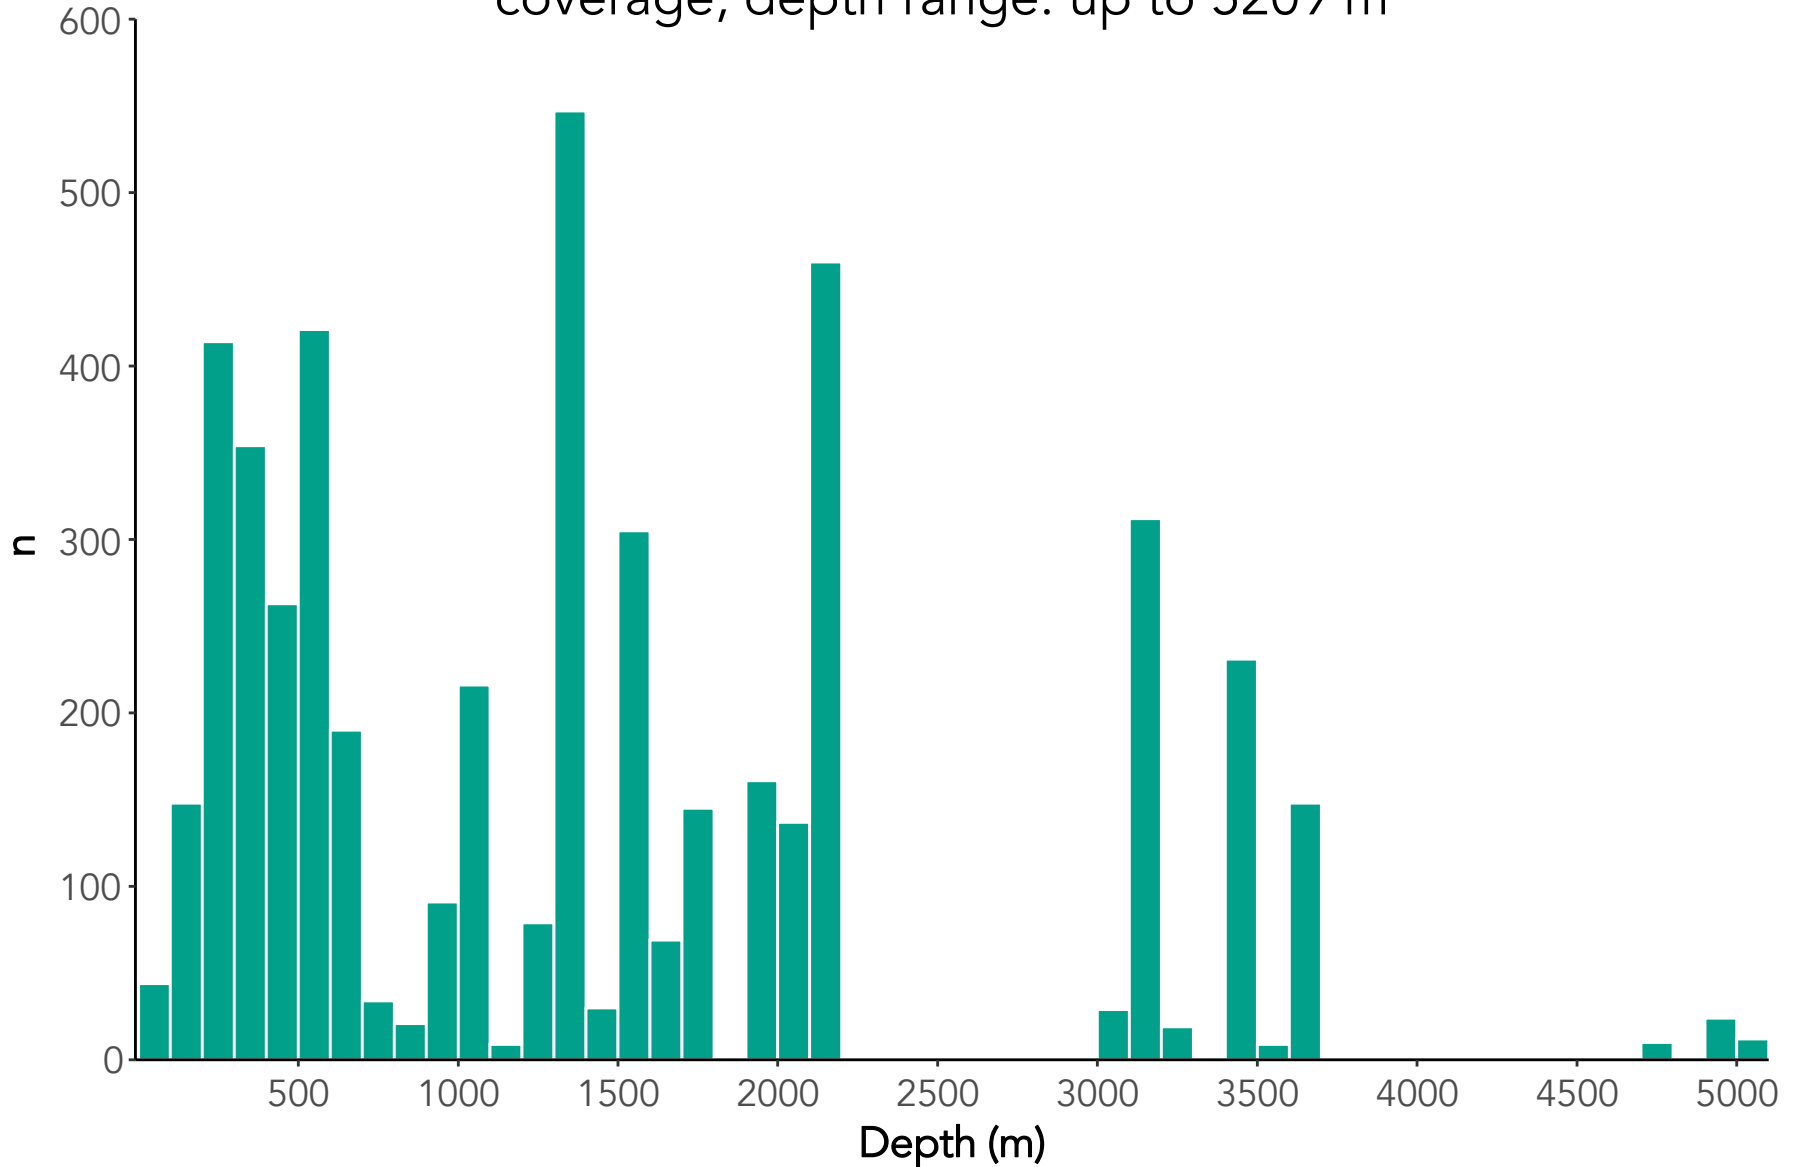

Annelida

Chordata

Other

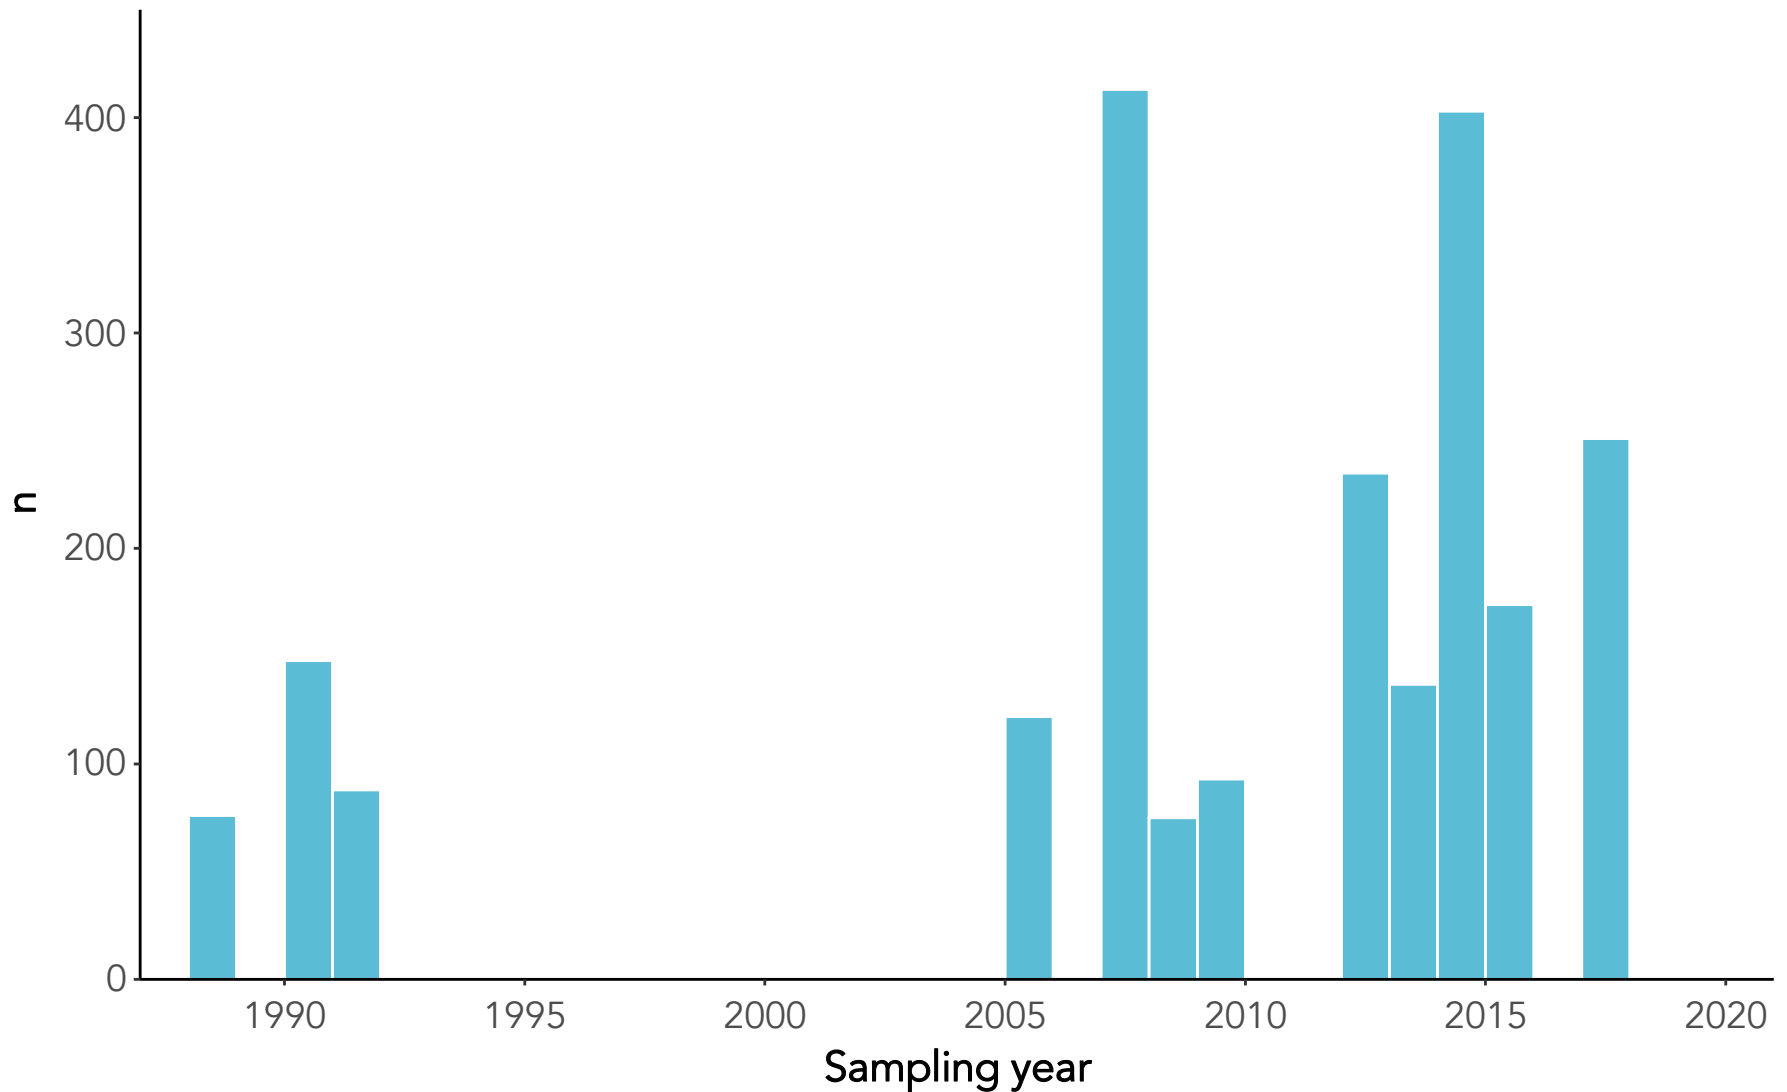

DeepIso v1

Spatial scope: almost global latitude (-62 to 67°) and longitude (-177 to 152°) coverage, depth range: up to 5209 m

DeepIso v1

Temporal scope: 1989 to 2018

DeepIso: what's next?

- Integrate DeepIso with larger scale initiatives such as IsoBank

DeepIso: what's next?

- Integrate DeepIso with larger scale initiatives such as IsoBank
- Keep building up the database and maximising its scope by integrating more data

DeepIso: what's next?

- Integrate DeepIso with larger scale initiatives such as IsoBank
- Keep building up the database and maximising its scope by integrating more data
- We are looking for people willing to share data, either underlying published articles, grey literature or even unpublished
- We can help with data formatting and/or publication
