

Global warming: ~~+ 2.5 °C~~
+ 1.5 °C

What part do ecosystems play in mitigating climate change?

What are the most effective measures to promptly reduce carbon emissions?

What are the appropriate actions to take for each ecosystem type?

What part do ecosystems play in mitigating climate change?

What are the most effective measures to promptly reduce carbon emissions?

What are the appropriate actions to take for each ecosystem type?

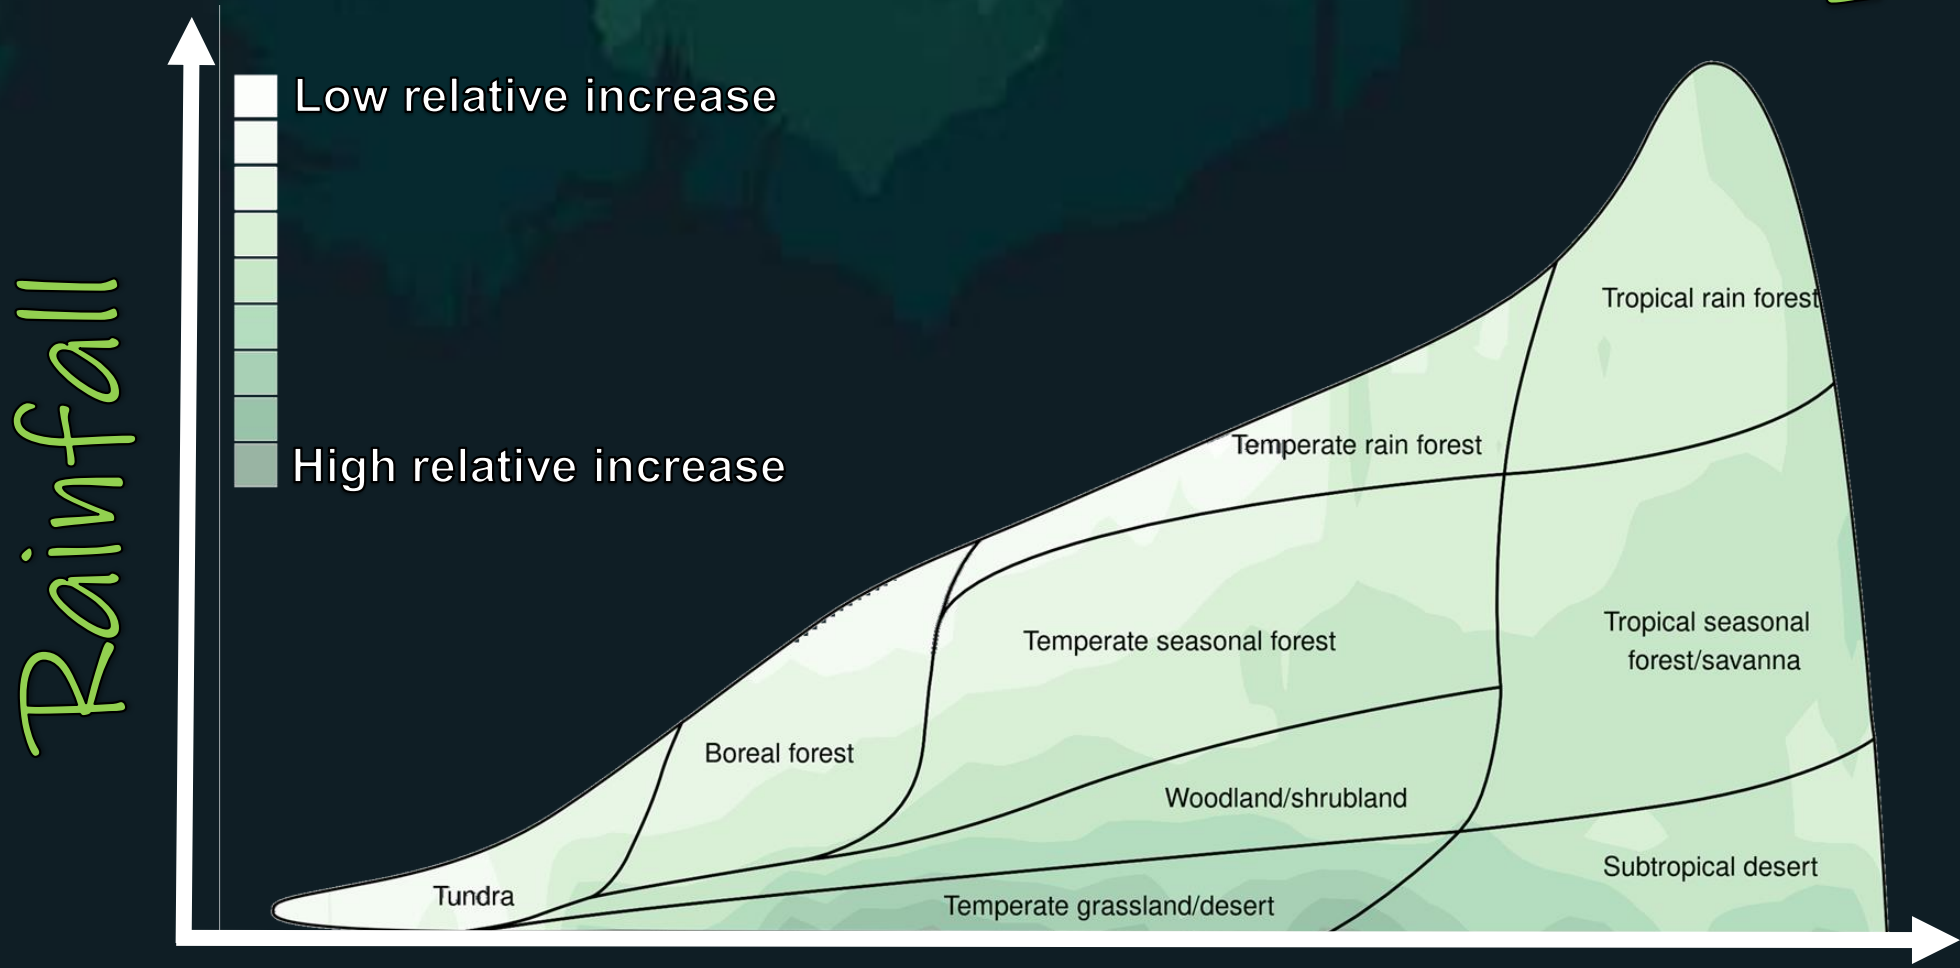

Reliable models of ecosystem dynamics in a changing climate

What is the capacity of models to capture changes in ecosystem services due to environmental stresses?

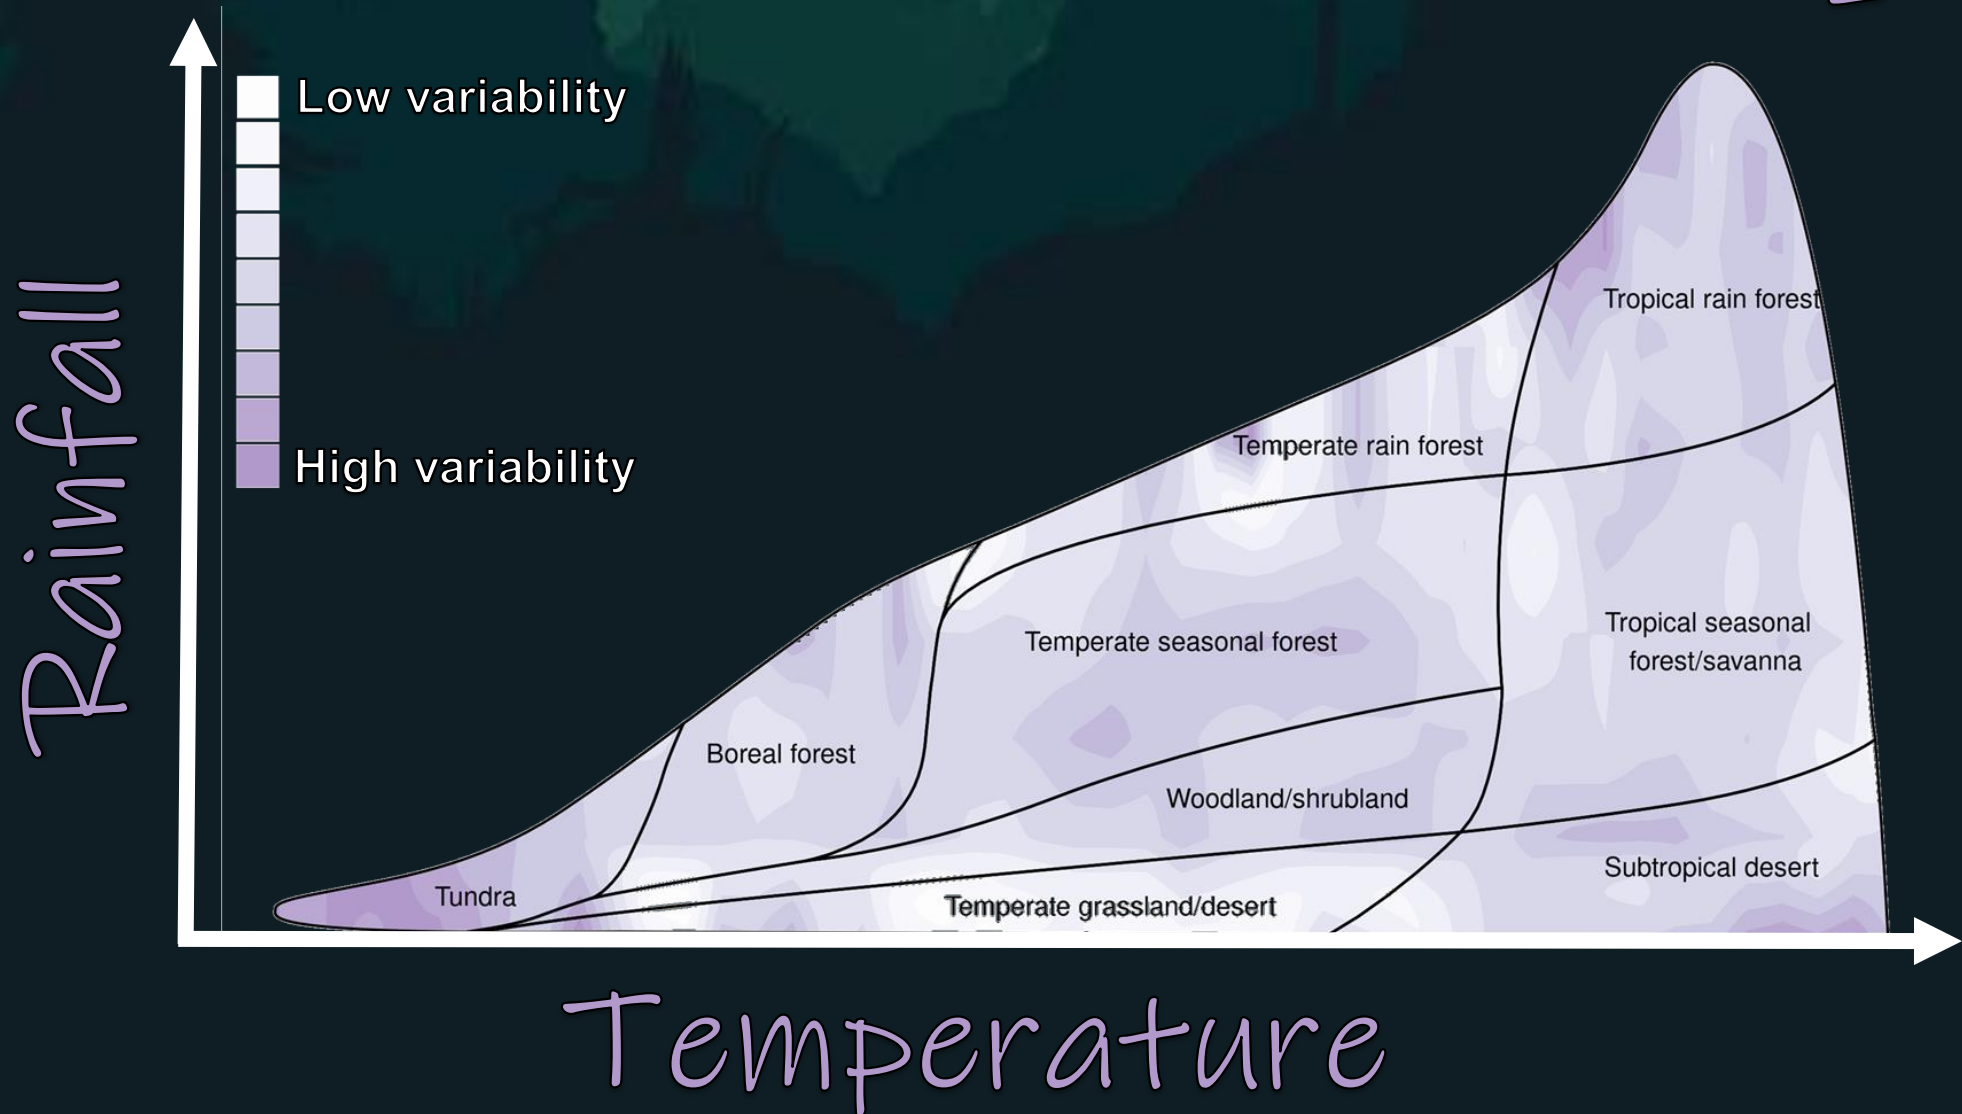

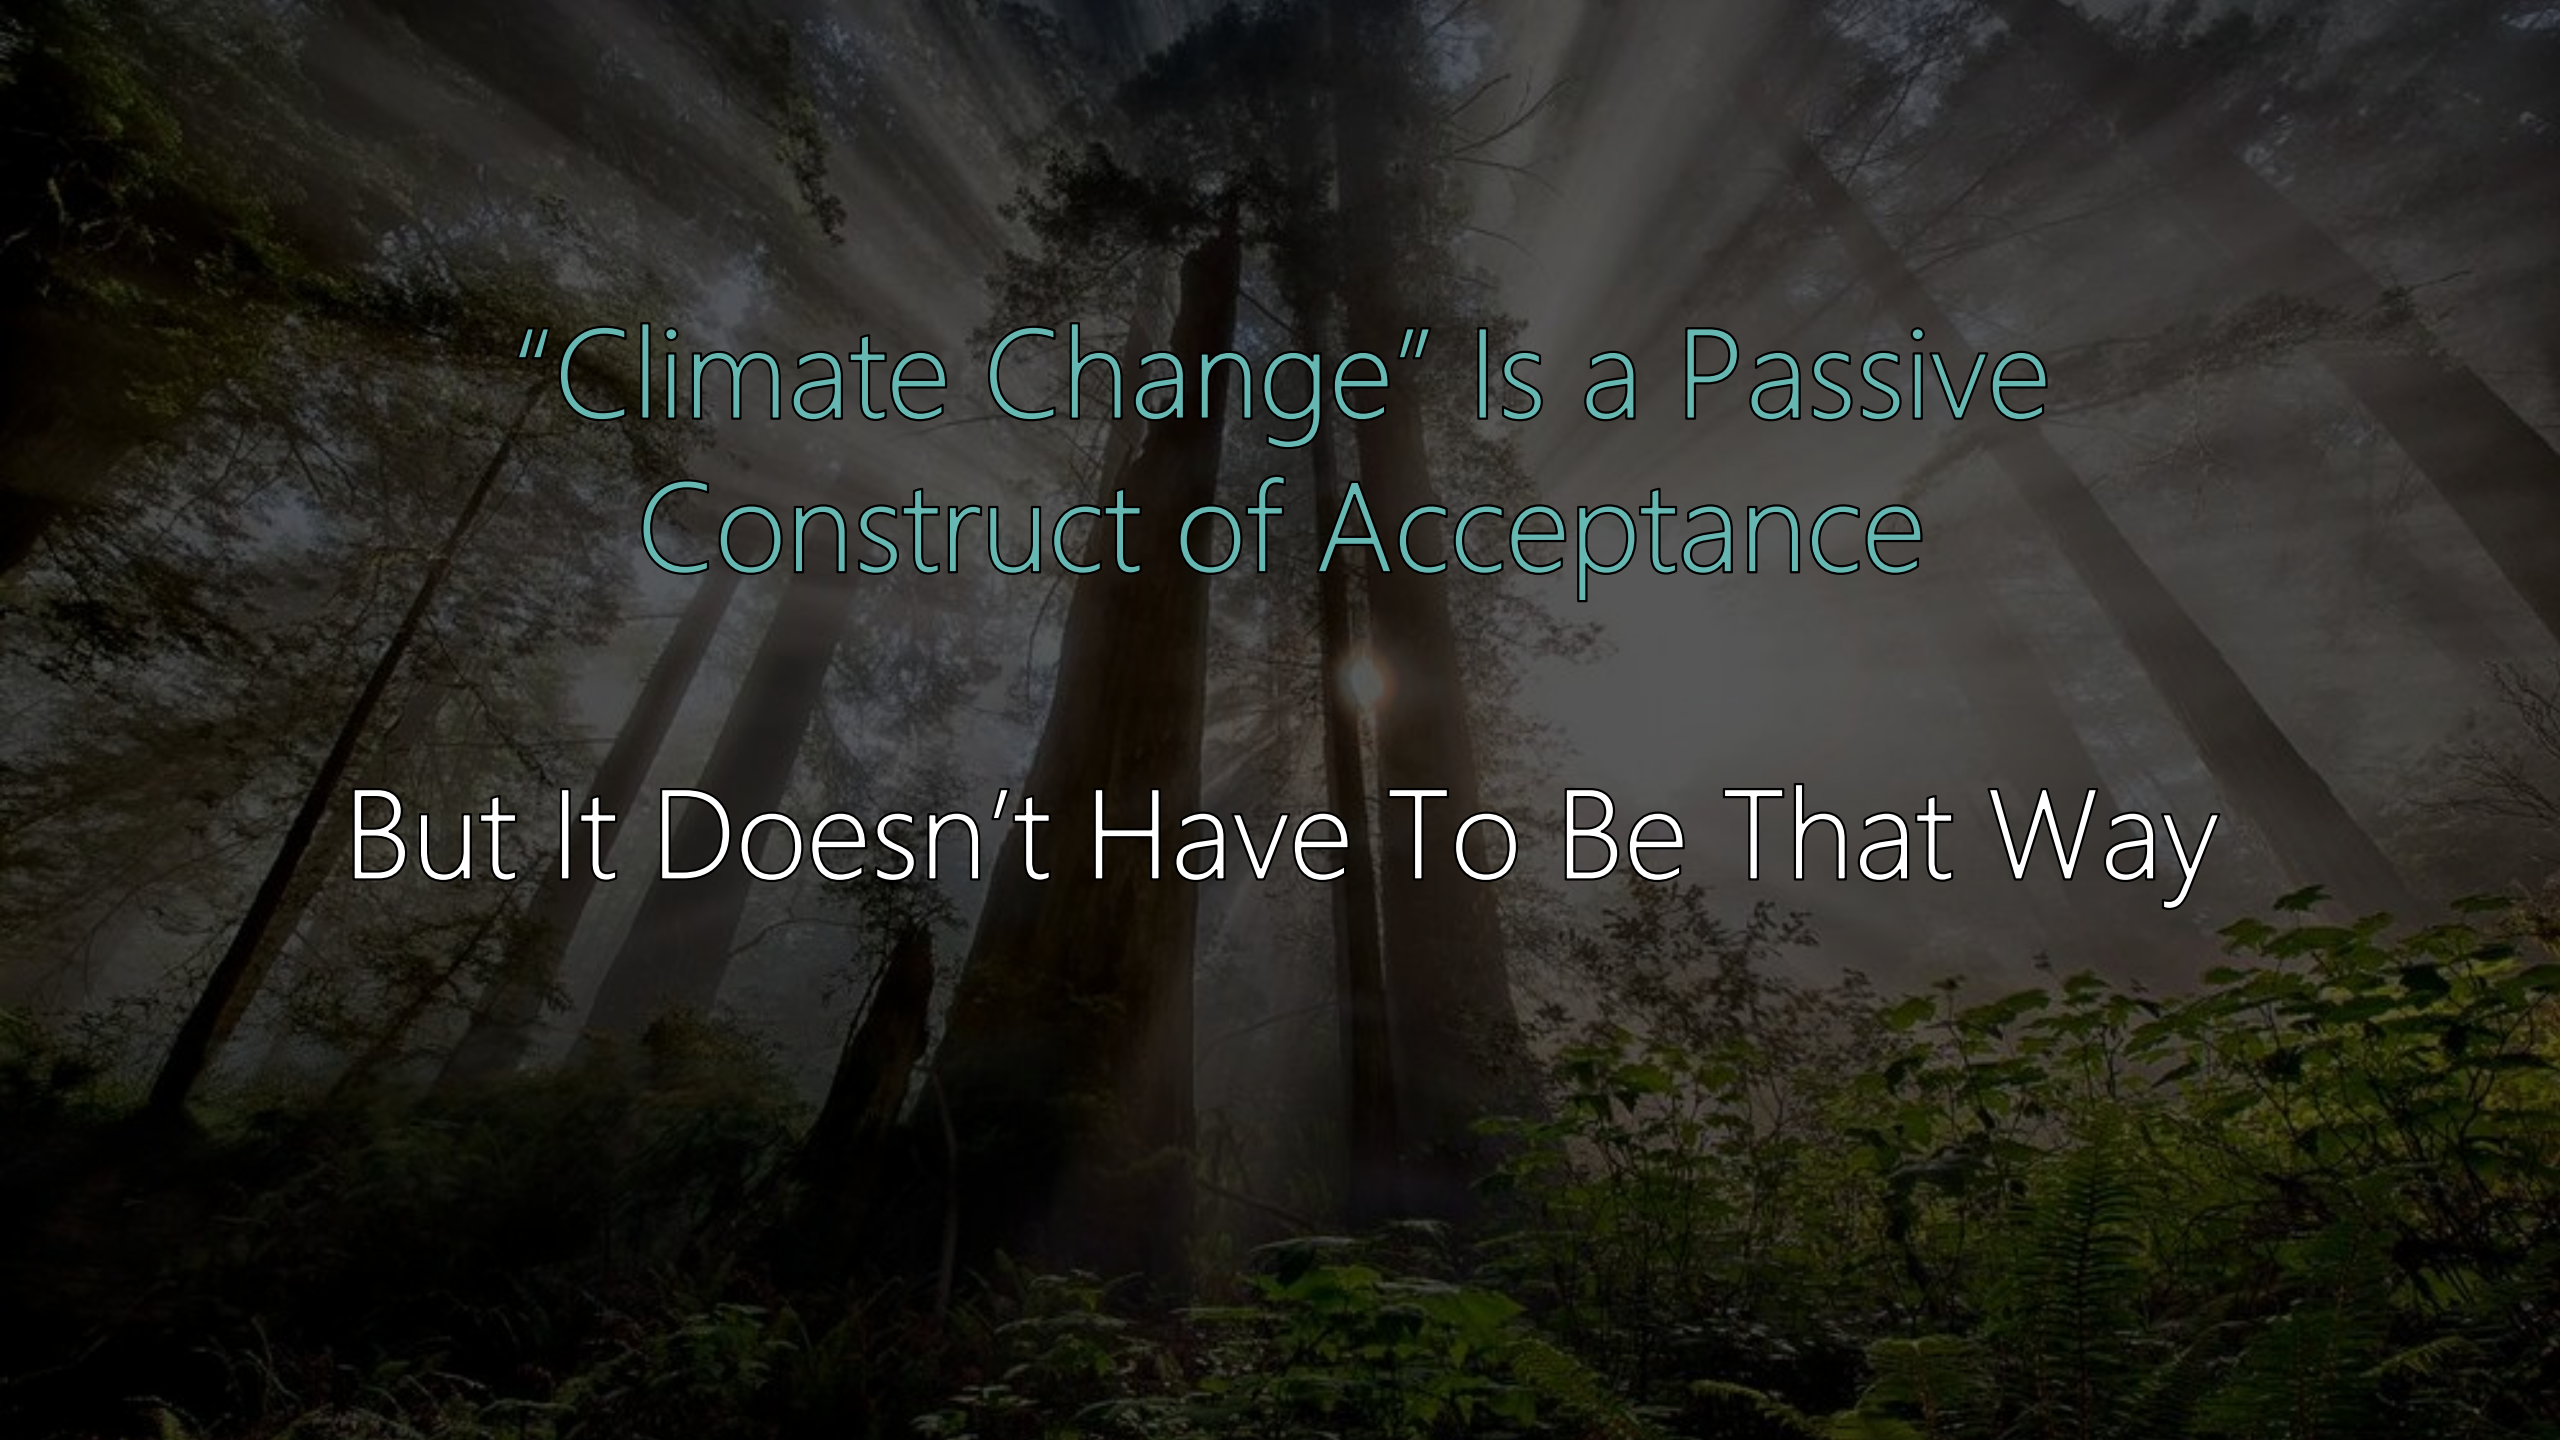

Net Carbon Assimilation (eCO_2)

Temperature

Net Carbon Assimilation (eCO_2)

"Climate Change" Is a Passive
Construct of Acceptance

But It Doesn't Have To Be That Way
