

Immersion into a 360° video device to stimulate coaches' self-evaluation on their observation

7^{ème} Congrès International de la Société Française
de Psychologie du Sport

Gilles Lombard & Marc Cloes

Literature

Ecological paradigm
(Araujo et al., 2006)

Situation
Awareness Theory
(Endsley, 1995)

Model of visual
attention in sport
(Williams et al,
2004)

Environment perception
= Crucial for the
performance

Study in a close to reality
context

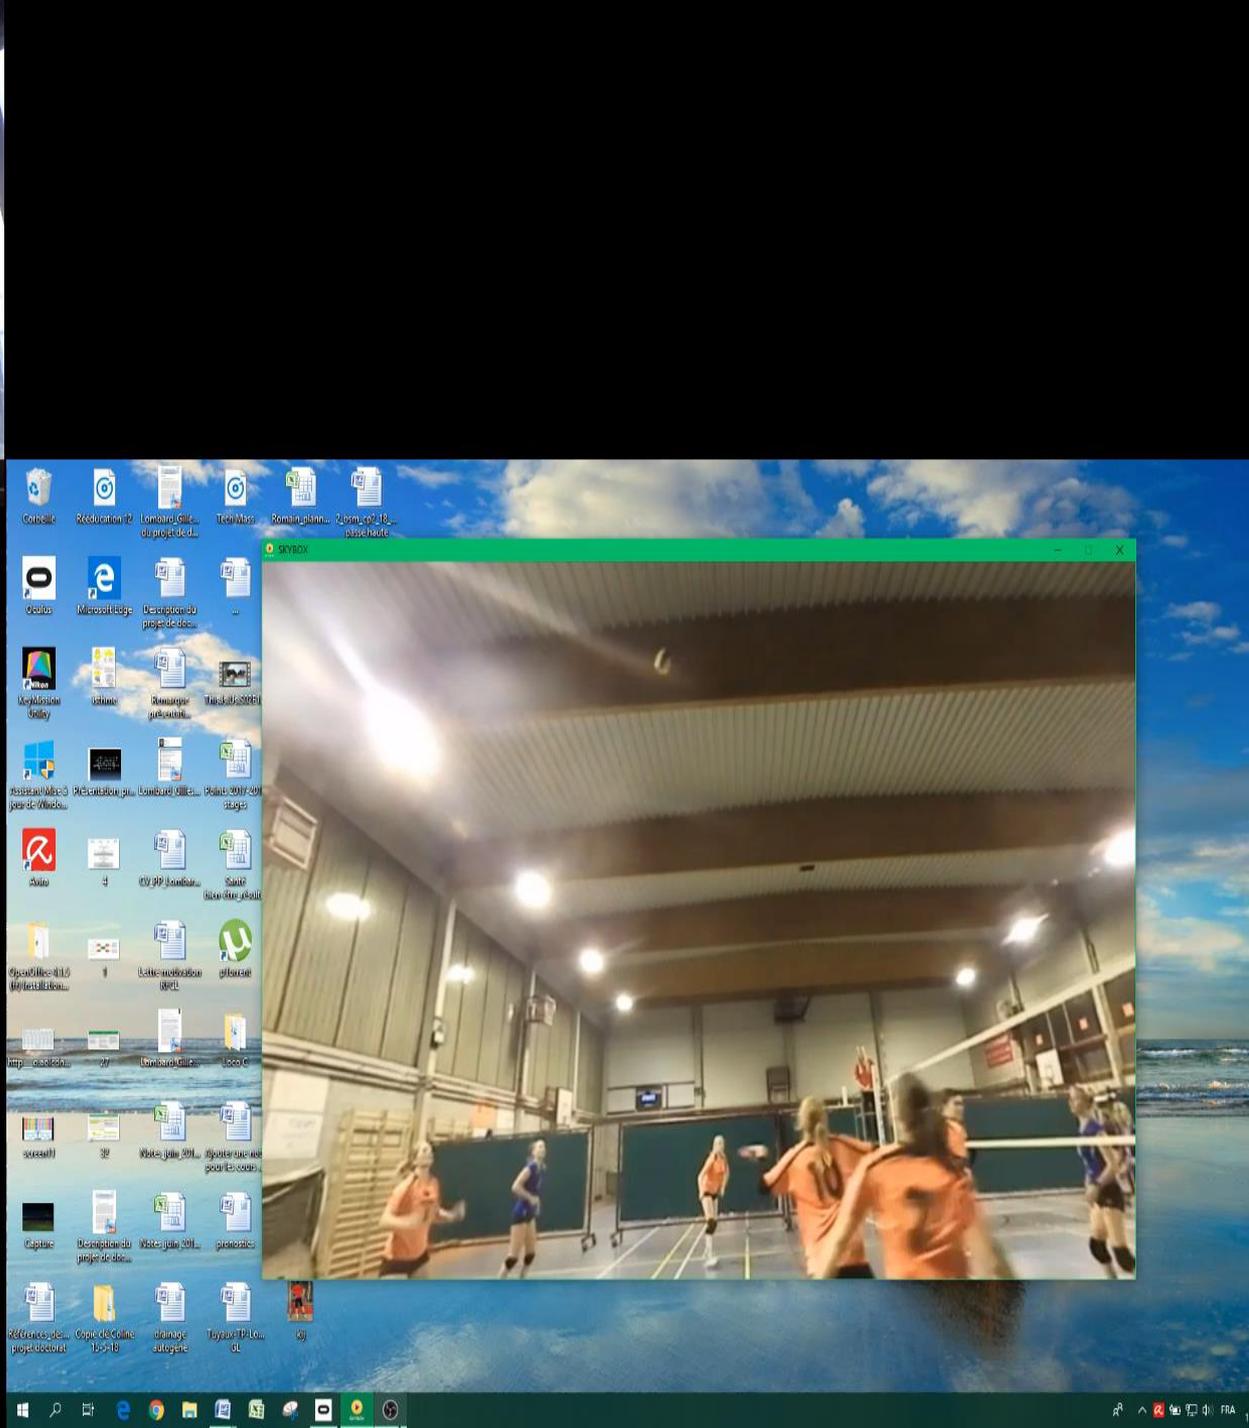

Literature

- Scoping review
 - Aim : Exploring the literature focusing on the observation by sport actors in official sport competition context
 - Methods : Arksey et O'Malley (2005)
 - Results :
 - Eye tracker (96,6%)
 - « VR » (3,3%)
 - Coaches (8,3%)

Aim : To study the impact of a 360° video device on volleyball coaches' awareness of their observations during a competitive situation

Methods

- 360° video device (Lombard et al., 2022)
 - Two game simulations
 - 360° camera near the bench (1.75 m of the side line)
 - 15-20 minutes sequences
 - Think aloud protocol

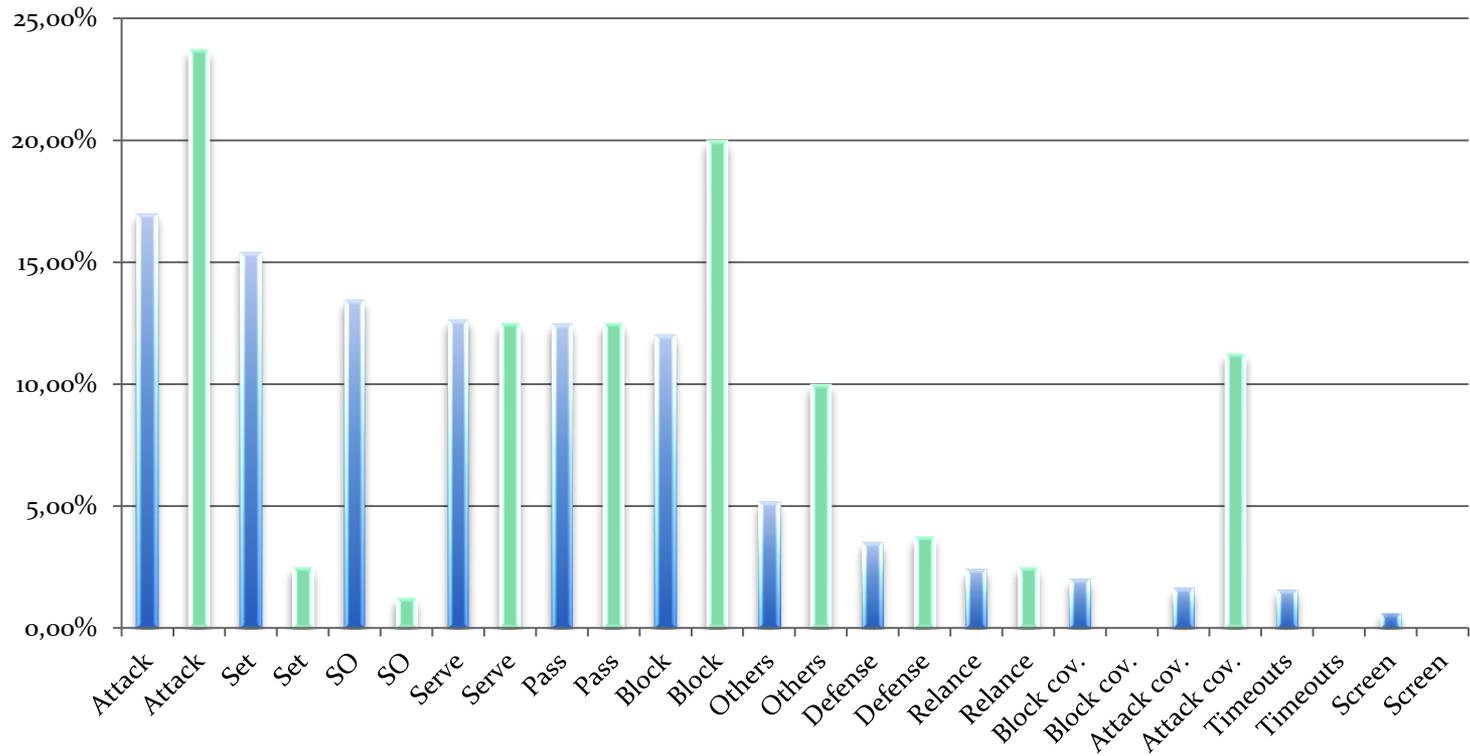

Methods

- Qualitative experimental design
- 7 coaches
- 3 steps
 - 360° immersion with coding by researchers → Report
 - Stimulated recall
 - Final interview

Methods

Types of actions

Methods

	Aces (2)	1 block attack (8)	No block attack (2)	First serve (2)	Bad pass (5)
Number (sample)	1,55	2,77	0,44	0,77	3,44
Percentage (sample)	77,50%	34,63%	22,00%	38,50%	68,80%
Number (subject)	2	1	0	1	4
Percentage (subject)	100,00%	12,50%	0,00%	50,00%	80,00%

Results

- Awareness
 - 3 subjects were surprised and wanted to modify at least one element of their observation strategy
 - 3 subjects were not surprised but pointed out their will to modify at least one element of their observation strategy
 - 1 subject was not surprised and did not want to modify his/her strategy

Results

- Awareness

« Now I know that I have to look at the entire team and really have to try to observe every players »

« I will be more focus on the opponent team, it will clearly have an impact on me »

« I look at many more elements than before. Now I have to find the perfect balance to avoid neglecting the others »

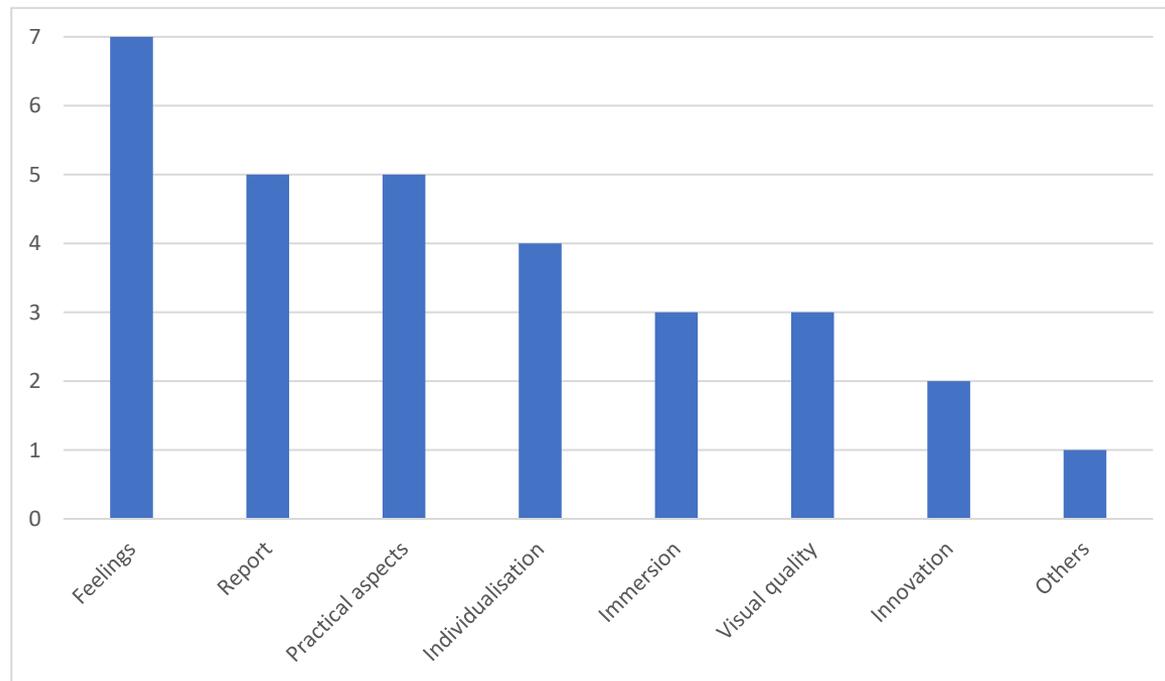

Results

- Awareness

« Maybe I have to look more at my team because we confirmed that I was more attracted by the other team »

Results

- Positive points

Results

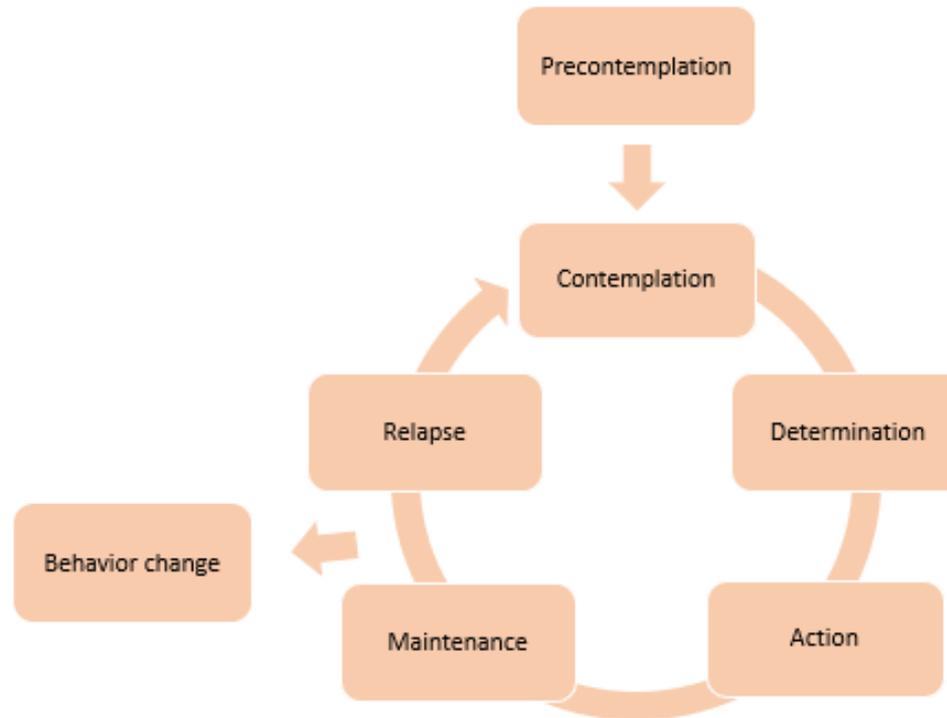

- Editable aspects
 - Longer experience
 - Level of the games
 - Lack of interaction

Discussion

- The coaches seem to have a bad perception of their practice (Millar et al., 2011 ; Partington & Cushion, 2013)

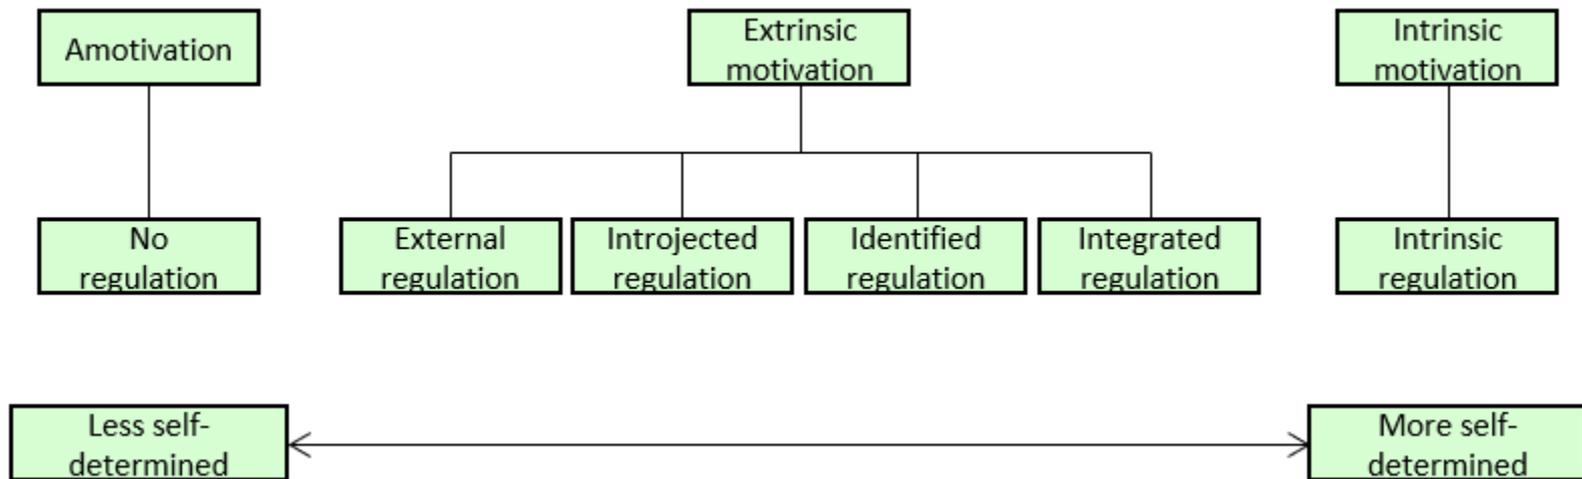

Discussion

➔ Transtheoretical model of behavior change (Prochaska & DiClemente, 1983)

Discussion

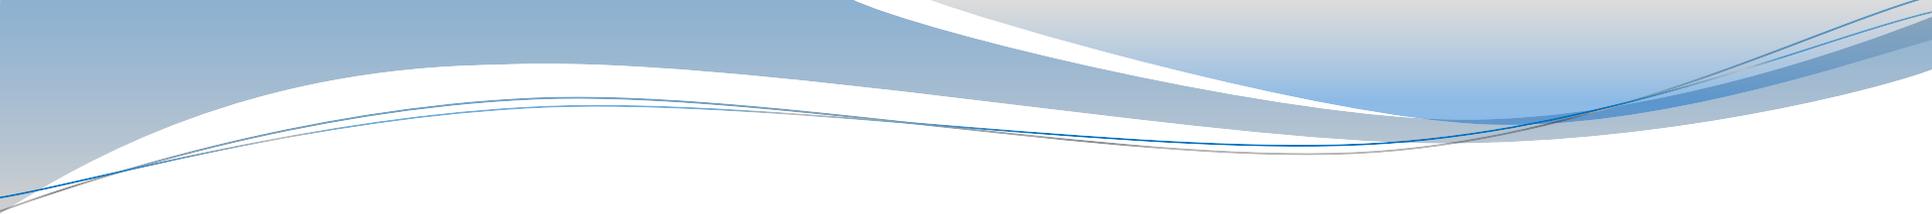

➔ Self-determination theory (Ryan & Deci, 2000)

- Autonomy
- Sense of competence
- Social inclusion

Perspectives

- Continue to recruit and educate coaches on the field
 - More individual experiences
 - Longer education
- Mix the protocol with others to explore the implicit aspects and the decision-making process

**Thank you for
your attention**
