

### Supplementary material 3

**Table A1.** Results of a linear model on the effects of species, sex, morph and their interactions on the body size (log snout-vent length) of newts in a southern French population inhabited by introduced alpine and native palmate newts.

Effect	Estimate	SE	<i>t</i>	<i>P</i>
Species (palmate newt)	-0.115	0.006	-18.483	<0.001
Sex (male)	-0.115	0.006	-18.829	<0.001
Morph (paedomorph)	-0.048	0.012	-3.713	<0.001
Species x sex	0.030	0.008	3.496	<0.001
Species x morph	-0.080	0.015	-5.068	<0.001
Sex x morph	0.056	0.043	1.309	0.190
Species x sex x morph	-0.006	0.046	-0.147	0.883
