CONTENTS

Preface

iii

Chapter 1 Estimation of Survival Probabilities

1.1	Introduction	1
1.2	Life Table (or Actuarial) Estimates	3
1.3	Kaplan-Meier Product Limit Estimates	5
1.4	Example: Preoperative Radiation for Rectal Cancer	12
1.5	Comparison of Methods	16
Appendix 1.1	Maximum Likelihood Estimation	21
Appendix 1.2	Maximum Likelihood Estimates Under the Actuarial Assumption	22
References		25

Chapter 2 Standard Errors and Confidence Bands for Survival Rates and Curves

2.1	Introduction	27
2.2	Standard Error of the Life Table Survival Rate	29

2.3 Confidence Bands for the Kaplan-Meier Survival Curve	35
Appendix 2.1 Derivation of the Greenwood Formula	47
References	48

Chapter 3 Nonparametric Methods for Comparison of Two or More Survival Curves

3.1 Introduction	51
3.2 The Mantel-Haenszel Test Comparing Two Treatments	54
3.3 The Peto-Pike Simplification for Three or More Treatments	63
3.4 The "Power Law" Relation Between Survival Curves	64
3.5 Weighted Mantel-Haenszel Tests	66
Appendix 3.1 More Exact Procedure for Comparing Three or More Treatments	73
References	74

Chapter 4 The Effects of Covariates on Survivorship: Proportional Hazards Models

4.1 Introduction	77
4.2 Covariate Regression Models	79
4.3 The Hazard Function and the Concept of Proportional Hazards	80
4.4 Proportional Hazards Based on the Weibull Distribution	87
4.5 Cox's Proportional Hazards Model	89
4.6 Estimating Survival Rates Under the Cox Model	92
4.7 Treatment-Covariate Interaction	105
Appendix 4.1 Methods for Estimating the Hazard Function	112
References	120
	123

Chapter 5 Nonproportional Hazards

5.1 Introduction	127
5.2 Graphical Tests for Proportional Hazards	129
5.3 Three Examples of Nonproportional Hazards	130
References	140
	154

Chapter 6 Survival Analysis with Time-Dependent Covariates

6.1 Introduction	157
6.2 The Predictive Abilities of Tumor Markers	159
6.3 Changing Prognosis in Acute Disease	160
6.4 Concluding Remarks	172
References	181
	182

Chapter 7 A Few Words on Computer Programs

Combined List of References	185
	189

Index	197
