

Managerial insights into the nocturnal environment: An interdisciplinary analysis

Dissertation submitted in fulfilment of the requirements
for the degree of Ph.D. in Economics and Management
by

Elodie BEBRONNE

Thesis Jury Members:

- Prof. Jan BOGAERT
(Gembloux Agro-Bio Tech, University of Liège)
- Prof. Sabine LIMBOURG, Supervisor
(HEC Liège, Management School of the University of Liège)
- Prof. Jordi NOFRE
(Universidade NOVA de Lisboa)
- Prof. Sara PEROTTI
(Politecnico di Milano)
- Prof. Thierry PIRONET, President of the Jury
(HEC Liège, Management School of the University of Liège)
- Prof. Didier VAN CAILLIE
(HEC Liège, Management School of the University of Liège)

Contents

1	Introduction	15
1.1	Light pollution: a complex phenomenon	15
1.2	Interdisciplinary nature of the research	17
1.3	Philosophical foundations: Pragmatism	17
1.4	General framework and hypotheses	18
1.5	Structure of the dissertation and contributions	19
2	Towards sustainable nocturnal environment management	
	<i>A social-ecological-technical system analysis in Wallonia, Belgium</i>	25
2.1	Introduction	29
2.2	Research background	31
2.2.1	SES research: a framework for integrating evidence into policy	31
2.2.2	Sustainable management of the nocturnal environment	32
2.3	Materials and methods	35
2.3.1	Study area	35
2.3.2	Methodology	36
2.4	Results: Macro-environment of the nocturnal environment in Wallonia	38
2.4.1	Political dimension	38
2.4.2	Economic dimension	42
2.4.3	Social dimension	42
2.4.4	Technological dimension	43
2.4.5	Environmental dimension	44
2.4.6	Legal dimension	46
2.4.7	Summary of the PESTEL analysis	46
2.5	Discussions - Night as an interdisciplinary field	48
2.5.1	Strategic opportunities, uncertain impacts and threats	48
2.5.2	Priority leads for future actions in Wallonia	51

2.5.3	Research challenges	56
2.6	Conclusion	59
3	Collaborative pathways to sustainable lighting	
	<i>Network analysis of public lighting management in Wallonia</i>	61
3.1	Introduction	65
3.2	Research background	67
3.2.1	Theoretical framework and visualisation methods	67
3.2.2	Actors of public lighting management	70
3.2.3	Public procurement of innovation in lighting	72
3.3	Materials and methods	72
3.3.1	Study area	72
3.3.2	Methodology	73
3.4	Results: Actors, interdependencies and collaboration	77
3.4.1	Interdependencies	77
3.4.2	Collaboration in triadic supplier relationships for PPI	81
3.5	Discussion and conclusion	85
3.5.1	Theoretical implications	85
3.5.2	Practical contributions	86
3.5.3	Perspectives	87
4	Social acceptability of public lighting reductions for light pollution mitigation	
	<i>A regional, repeated cross-sectional study amidst the energy crisis</i>	89
4.1	Introduction	93
4.2	Literature review	94
4.2.1	Social acceptability of policies reducing public lighting	95
4.2.2	Predictors of acceptability	96
4.2.3	Research hypotheses	98
4.3	Methodology	98
4.3.1	Study area	98
4.3.2	Data collection	99
4.3.3	Sample description	101
4.3.4	Sample validity	103
4.3.5	Data analysis	103
4.4	Findings	104
4.4.1	Factors associated with the acceptability of lighting reductions	104

4.4.2	Evolution of acceptability of reductions of public lighting	112
4.5	Discussion	120
4.5.1	Synthesis of findings and theoretical implications	120
4.5.2	Practical implications and policy recommendations	121
4.5.3	Perspectives	122
4.6	Conclusion	125
5	Logistics 5.0 for public lighting systems	
	<i>Research agenda</i>	127
5.1	Introduction	131
5.2	Methodology	132
5.3	Findings: Logistics 5.0 principles for public lighting systems	133
5.3.1	Integration of smart technologies and data	134
5.3.2	Human-centricity	134
5.3.3	Sustainability	134
5.3.4	Resilience of the systems	136
5.4	Open challenges for public lighting management	136
5.5	Research directions for sustainable public lighting within Logistics 5.0 . . .	138
5.5.1	Research agenda	138
5.5.2	Performance assessment	140
5.5.3	Managerial implications	140
5.6	Perspectives	142
6	Conclusions and Perspectives	145
6.1	Synthesis of chapter findings	147
6.2	Implications of the thesis	149
6.3	Limitations	150
6.4	Perspectives	152
6.5	Reflections	154
	Note on the use of artificial intelligence	157
	Bibliography	157
	List of Figures	203
	List of Tables	205
A	Appendices for Chapter 2	209

A.1	Method for thematic sorting of media coverage	209
A.2	Results of thematic analysis of media coverage	210
B	Appendices for Chapter 3	213
B.1	Interview guides	213
B.1.1	Interview guide 1 - Exploratory phase	213
B.1.2	Interview guide 2 - Exploratory phase	215
B.2	Actors interviewed in the exploratory phase	215
B.3	Interview guide used in the focused inquiry phase	217
B.4	Actors interviewed in the focused inquiry phase	219
B.5	Details on local authorities - Focused inquiry phase	221
B.6	Generalisation to other public sectors	221
C	Appendices for Chapter 4	227
C.1	Detailed map of public lighting policy change between 2023 and 2025	227
C.2	Details on survey periods, structure of the population, sample structure and weights	228
C.2.1	Details on comparison of day lengths across surveys	228
C.2.2	Structure of the population, sample structure and weights	228
C.3	R packages used for statistical analysis	233
C.4	Details on acceptability of measures reducing public lighting	234
C.5	Acceptability of reductions around domicile	235
C.6	Additional detail on stated fears	236
C.7	Additional detail on mobility variables	237
C.8	Details on variance inflation factors (VIF) for the logistic regression model	238
C.9	Summary of collected variables	239
