Session: ICDRI 2024 Fellowship Feature – Fellow Spotlight

Organizer: Coalition for Disaster Resilient Infrastructure (CDRI)

Date: 25 April 2024

Place: New Delhi, India

Language: English

Role: Invited panelist

Abstract

This oral contribution was delivered as part of the *Fellow Spotlight* session of the ICDRI 2024 Fellowship Feature, held during the 6th International Conference on Disaster Resilient Infrastructure. The session brought CDRI Fellows to share experiences, lessons learned, and perspectives on disaster and climate-resilient infrastructure.

As a panelist, the contribution focused on the transition from research to action in infrastructure resilience. It addressed the enablers and barriers encountered when translating research outcomes into practical approaches for disaster risk reduction and resilient infrastructure planning. The discussion also reflected on how the CDRI Fellowship project could support future research and action on flood risk, urban vulnerability, and infrastructure resilience in Madagascar.

Note

This document is a text-only abstract of an oral panel contribution. No slides were required for the session.
