

New geological map of Wallonia (south part of Belgium)... Now Online Integration with other mapping projects of the Walloon Region Ministry

Today, among the 142 maps concerning the walloon territory, more than 55 have been surveyed in the field and are drawn at the scale of 1/25000. Since 1990, five teams of two geologists, coming from scientific institutions, are working on this project financed by the Walloon Region Ministry (regional government).
