Transnational application to the IRBD Meuse

**NL** : simulated and validated (year 2005) on the Geul basin – under construction for the whole Dutch basin

**DE** : simulated and validated (year 2005)

**BE-Flemish Region** : simulated and under validation (year 2005)

**FR-Artois Picardie** : data to be improved

**BE-Walloon Region** : simulated and validated (years 2002 and 2005)

**LU** : simulated and validated (years 2002 and 2006)

**FR-Meuse Rhine** : simulated and validated (years 2002 and 2005)

Sub-basin application on the Chiers (LU + BE-Walloon Region + FR-Meuse Rhine, 2000-2006) for the reference years 2000 and 2002 and prospective scenario 2015

International simulation already performed (during 2005-2006) upstream (up to the Belgian border) for the reference year 2002

Current coordination between BE-Flemish Region and NL for downstream simulations of historical situation and prospective scenarios

International databases are currently under construction for a single reference year : simulation and validation in progress on the whole Meuse District

With grateful thanks to the German Ministry of Environment and Conservation, Agriculture and Consumer Protection of North Rhine-Westphalia (DE) for their close collaboration
