(54) **LOW-VISCOSITY ALLOPHANATES HAVING ACTINICALLY HARDENABLE GROUPS**

unsaturated compounds while polymerizing, to a method for producing these conversion products, and to their use in coating agents.

(57) Abstract:

© KIPO & WIPO 2007

The invention relates to low-viscosity conversion products of polyisocyanates containing activated groups that, under the influence of actinic radiation, react with ethylenically
