

<p><b>The art and science of teaching in physical education and sport.</b> <b>A homage to Maurice Piéron</b></p>
--

### **Reference of the chapters**

**Authors of the chapter (2005). Title of the chapter. In, F. Carreiro da Costa, M. Cloes & M. González Valeiro (Eds.), The art and science of teaching in physical education and sport. Homage to Maurice Piéron (pp. XX-XX). Lisboa: Faculdade de Motricidade Humana.**

### **Preface**

This book is, before all, a sign of recognition and friendship. The content of the book intends to express the main characteristics of Maurice Piéron's personality: competency, engagement involvement, liability, reliability and an open mind spirit towards different cultures and mentalities.

Some texts conceptualise the content of sport pedagogy; others present the state of the art in some lines of research in physical education, sport or physical education teacher education; others offer a critical reflection focused on some scientific alternatives, and, finally, some texts establish links between the knowledge produced by research and its application in practice.
